Extract

Professional in computer science with extensive experience in project development based on Java technology and Web platforms.
Interested in health research area.
I am known for being highly responsible, organized, have initiative and teamwork, as well as capability to learn and constantly update myself the new technologies to continue the professionally grow.

Academic Formation

- Degree in Information Technology – Palermo's University (2011 - 2015)
- System Analyst of computing - ORT (2008 - 2011)
- Medical career – UBA (2003-2008 uncomplete)
- Commercial degree – Educative Institute Ser (1998 - 2002)

Courses

- January 2010, JAVA basics training in CAPTTON. Subjects: java j2ee, SQL Database, java web and Hibernate ORM.
- June 2010, IBM DB2 Database system design certification.

- June 2010, Microsoft Visual Studio Net 2008 certification.
- December 2010, IBM Rational Systems using Object Oriented programming.
- April 2011, JavaWeb: Servlets, JSP, JSTL, Struts y AJAX in educaciónIT college
- November 2011, Oracle SL-273 ItCollege certification on Java SE6.
- November 2015, DevOps, Buenos Aires
- June 2017 Google Cloud Comping Platform
- July 2017 Java 8 & 9 Mercado Libre's Meetup

Experience

Developer (December 2017 – Present)
Resolvit S.R.L.

Project:

- ***PPD (Pharmaceutical Product Development) USA***

  Working on the Vaccine Research project.

Technical leader role.

Techs: Microservices architecture.
Backend based on Java 13, Spring, Apache POI and Maven.
Frontend based on ReactJS, Redux saga, AGgrid
Oracle Database.
Docker
Tomcat
GIT, Jenkins, Jira

- ***Teleperformance***

  Full Stack Develop

Techs: SQL Server database on the backend.
Web platform project based on ReactJS and C# Web API.

- ***Placester USA***

  Full Stack Develop and review of new features and bugs fixe***s*** of Real State platform online with high concurrence.

Techs: Java, NodeJS, Underscore.js, Backbone.js, Marionette.js, Kendo, GraphQL, Knex
AWS: Amazon Cloud Formation, Amazon Cloudwatch, Amazon Codepipeline, EC2, S3, SNS, SQS, IAM
Docker

Methodology: Scrum

SO: Ubuntu
Repo: GitHub

Programmer Analyst Senior (May 2013 – December 2017)
Snoop Consulting S. R. L. (Sarmiento 1230)

Projects:

- ***Guru (PaginasAmarillas.com.ar / PaginasBlancas.com.ar)***
  Region website consolidation with Argentina, Chile, Perú, Colombia, Honduras, Costa Rica business model.

Update and improvements to the Apache Solr Lucene search engine.

This changes let's optimize the effort and time applying a single development to all the countries.

Value Demonstration, a batch application to process the Google Analytics, Google Adwords, and Yellow Pages metrics whose purpose is to show the product visibility to the customer.

Techs: Java, Junit, Javascript, JSP, Solr Lucene 5.0, Spring Core, Spring MVC, Spring Data, Spring Security, Struts 2, MySql, Oracle, Linux, Maven, SVN, Jenkins, Trello, Slack, Jira, Hibernate, MongoDB, Cassandra and HBase.

QBE

Migration of functional components in VB6 to Java by a plug in conversion and a custom program converter using regular expressions and unit testing and deploy.

Tech: Java 6, Maven, Spring, Junit, JDBC, GIT, Jboss and WebLogic.

Senior Programmer (March 2010 - May 2013)
Accenture

- ***Iberdrola*** (Spanish Energetic enterprise)

Maintenance task in java (j2ee) and java web with CMMI quality certification in level 3.

I made technical designs with the unit testing documentation. Develop the solution in Java language and partner code supervising. Peer review and customer communication.

Tech: Java web /J2EE: Struts, Servlets, JSP, Display Tag, DAO, JSTL

Summary Technologies

- Java (version 5 to 13) Struts, Servlets, JSP, Display Tag, Maven, Javascript, Spring MVC, Hibernate, Junit, Log4j, DAO, JSTL, POI, EJB 3 y WebSphere IBM.
- NodeJS, ReactJS, saga, redux, Underscore.js, Backbone.js, Marionette.js, Kendo, GraphQL
- AWS: Amazon Cloud Formation, Amazon Cloudwatch, Amazon Codepipeline, EC2, S3, SNS, SQS, IAM
- C/C++
- C# web applications Visual Studio 2012 .Net.
- Android App
- JDBC, DB2, PL-SQL, ANSI SQL, MySQL, Knex
- MongoDB, HBase, Cassandra
- Solr 5.0
- Angular
- Chrome, IE, Firefox, Eclipse, IntelliJ, SVN, CVS, GIT
- Jenkins
- Jira
- Windows, Linux, bash

My Application

Angular Dashboard with Spring Boot, Rest API, MongoDB and Twitter4J to list in real time using Websocket, the custom hashtags in specific places.

Idioms

- Spanish
- English
