Experience

Sep 2019 - Present DevOps / Full Stack Dev at **Resolvit**

- Worked for a New York Fintech Startup dedicated to investments and asset trading
- Automated almost every piece of infrastructure creation using Terraform
- Migrated microservices from containers to lambdas using Serverless Framework
- Built pipelines in CircleCI to fully automate CI/CD in every project and internal lib.
- Implemented many features in the trading platform using Node.js, Typescript and Vue.js
- Built logger and retry services/libs leveraging AWS services such as CloudWatch and SQS

Sep 2018 - Sep 2019 DevOps / Full Stack Dev at **Lagash**

- Performed a cloud re-platform from on-premises to PaaS for the largest company in Argentina
- Created Ansible playbooks for Gitlab CI runners
- Built a dashboard for monitoring internal cloud resources using Node.js and React
- Implemented Payment gateway integrations with credit card providers using Golang
