- Jira
- SQL Server

COUNTRIES I WORKED FOR

• Provided support to and worked alongside teams from all over the world like USA, Malaysia, UK, Czech Republic, Hungary, the Netherlands, Australia, Ireland, Brazil, Guyana, Nigeria and India, among others.

MAJOR ACHIEVEMENTS

• Led the curation process in Alation for all the LatAm assets reaching a 99.3% of completion.

• Became the Data Quality SME by working and monitoring the most complex issues related to Data Quality in order to fix their root-causes and improve the processes.

• Remediated more than 9000 devices as result of the analysis performed to clean-up CMDB and to improve the DQ KPIs as part of the Service Now migration.

•Established and implemented a new DQ strategy to look for opportunities to improve the quality of the data.

WORK EXPERIENCE

Data Steward and Data Analyst for AON

ASAP Consulting S.A. 11- 2021 – Currently

- Leader of the Data Curation for LatAm region in Alation. Found and tagged LatAm assets, built relationships with the SMEs of each country, learnt about Alation and curated up to the 99.3% of the assets (curation average: 20%). In phase two, worked on the bugs fixes with the vendor, helped the Netherlands team with their curation process and joined a multidisciplinary team focused on the design and implementation of a Data Governance strategy globally.
- Leader of the Masterdata and Entity Matching projects (data gathering, analysis, data quality, regional and global standardization, tasks management, strategy and next steps proposal, monitoring of the different teams involved).
- Implemented Jira to track the projects in a more Agile way.
- Created a naming convention, templates and guidelines to standardize data.
- Proposed and established a new structure to organize the team's documentation in different tools.

Data Management & Analytics Analyst - IT

ExxonMobil BSC Arg. S.R.L. 04-2019 – 11-2021

- Take the lead on the Data Quality improvements' project for the Foundation Infrastructure organization.
- Develop dashboards.
- Help the Scrum Master and the PO to coordinate the team's backlog and to solve the roadblocks.
- Prepare, coordinate and facilitate the Foundation Infrastructure Data Governance meetings.
- Design the team's Onboarding strategy.
- Analysis and implementation of internal processes' improvements.
- Prepare and facilitate many soft skills trainings for the team.
- Work with Agile methodology.

MARÍA DE LAS NIEVES SCHAUFFELE CASSANO

MAJOR ACHIEVEMENTS

• Took the lead of the new Data Governance launch by restructuring it, engaging the participants, consolidating relationships with other Infrastructure teams, gathering the material and facilitating some of them.

o Implemented the idea of showcasing the team´s Data Quality efforts in Infrastructure LT meetings to reinforce the need of collaboration among the teams in order to improve the data quality of the devices.

o Proposed and held Customer Engagement meetings with members of all the Infrastructure teams in order to showcase what the team is capable of doing, know their customers better and find ways to help and work side by side with them.

o This effort changed the way of collaboration between Data Management & Analytics (DMA) team and its customers who started requesting DMA´s help to implement new solutions that have strategic value for the business and this allowed the team to improve its visibility and the career development of its members.
