Career Summary

A highly efficient, hardworking and talented software developer with more than 4 years of experience. Great communication skills and teamwork abilities. Committed and responsible. Always willing to tackle a tough challenge using good programming practices and comprehensive documentation.

Summary of Qualifications

Skills:

- Java and Golang
- HTML,XML,JS
- ReactJS
- AngularJS
- NodeJS
- AJAX
- UML
- Hibernate
- Jpa,Mybatis
- PL-SQL
- AppEngine
- SCRUM
- ReactJS
- AngularJS
- Oracle
- BigQuery

Languages

Spanish (native speaker)

English (advanced)

Career History

Globant
Aug 2021- Today
Java developer

Responsible for coding to Expedia store, with java and Koltin, using the latest technologies related to AWS, like EKS ECS, Redis database, Apache Kafka, Elastic load balancing, Cognito, Api gateway,Pulumi and Terraform.

ADL, Feb. 2020 –

July 2021

Golang Developer

Responsible for merging the logic on IBM-ApiConnect logic, to create microservices in Golang 1.14 and Http framework called Gin GONIC v1.7.2 , using the latest technologies related to AWS, like EKS, Redis database, Elastic load balancing, Cognito, Api gateway,Pulumi and Terraform.

GLOBANT, Feb. 2018 – June 2020 ***Fullstack Developer***

Responsible for developing new implementations in their code, for many companies like Disney, Espn and Blackboard, using the latest technologies related to java and Golang.

Project 1: the first project is the Shopping cart from Disney, is a giant app, with around 100 developers coding new implementations and fixing bugs, the backend is created with spring core 4, mysql database and couchbase, logs on splunk, the server is a tomcat modified, the dependences were handled by maven, and all is linked with AWS. (the coverage of the test should be around 90%).

Project 2: the second project is the Bottomline from espn, is a group of 10 to 15 small apps like microservices, with 3 layers (data, model and service), obtaining the data from stored procedures, and being propagated to REST endpoints, they had 3 mysql databases, they used micro services in Golang(gorilla mux http framework) and Java (spring boot and maven), and all is linked with AWS. (the coverage of the test should be around 90%). The Middleware was based on nodeJs, and I had to create the transition between the rest endpoints and the calls in the front end, and the front End was made on ReactJs and I had to fix some issues, or create new elements on react.

Project 3: The third project is Blackboard, is a giant app, with a monolithic base made on spring, and spring mvc, I had to create new implementations, fix bugs related with the new front end that is being made on React and Angular 5. The dependencies are handled by gradle.

Technologies used: (Java core, Jmeter, Splunk, Jenkins, RabbitMq). unit test, pair programming, GIT, Couchbase, Mysql, Tomcat. Spring Java 8, Docker. Maven, gradle,React, Angular, Aws, NojeJs

ASSIST CONSULTORES,
Feb. 2018 – May. 2018
Java Developer

Design of the web services for the risk project from BBVA bank. extracting the data fromCobol, creating the RAML that is like a Yaml, made to create the structure for the code,
evaluate and test the Web services. Using ant as a dependency

handler.Technologies used: java7, RAML, Yaml, Cobol, UT, Ant

MERCURY TFS Aug.
2017 – Nov. 2017
Full
Stack Developer
-SemchaJS-Java,
Javascript

Design of the web services for the Mercury Portal. The mercury portal is an application created to handle payments, policy and money transfer between countries , created for handle the info that the banks have to save when they transfer the money

to other or when export goods or services, I was developing new components for the web application from Banorte.

Technologies used: Spring4, AOP, SemchaJS, java7

PERIFERIA IT GROUP Mar. 2017 – Jul. 2017

Java Developer

Design of the front and back application for the Porvenir Portal. Develop new components with PL SQL, creating the front end with Primefaces, using ant to handle the dependencies, the servers were Weblogic, the environments were balanced between the front and the back
end.

Technologies used: Java 7, PLSQL, PrimeFaces

GRUPODOT Mar. 2017 – Jul. 2017 Full Stack Develope*r*

Design of the front and back application for UFF Portal. The Uff portal is an IT provider for colombian cell phones, the app called some endpoints coming from an external provider that validates the data, the plans, the available lines and the way that the user could charge or pay their bills, the payment was made calling an external api from PAYU, I had to Develop new components with
GCLOUD, mysql database, maven, spring mvc.

Technologies used: Java 7, Spring4, HTML5, Boostrap, SemchaJS, mysql

database,maven, spring mvc.

RITBOX SAS Jun.
2014 – Jun.
2014

Java Developer

I had to design the front and back end applications for Bank of Bogota Portal. I hadto develop new components with Weblogic, Boostrap, Oracle databases, and external services from the bank.

Technologies used:Java 7 , Spring4, HTML5, Boostrap, Jquery

XOFTIX SAS Feb.
2014 – May.
2014

Java Developer

I had to work on a JEE app, for the Backend application for lawyers in a company frompanamà.

Technologies used: Java 6, HTML, Boostrap, Jquery
