Enrique Juan de Dios

Full Stack Engineer

Developer with more than 11 years of experience in architecture, design and application development. Strong experience in UI development with knowledge of JavaScript throughout his career and with frameworks such as React, Angular and Svelte. Experience in leadership roles and as a full stack however I focus more on the frontend area. I had the opportunity to work in different types of companies throughout his career. I am a person very focused on meeting the objectives, very communicative and committed.
