Anderson Nuñez

Career Summary

I've been working on frontend development since 2018, from tracking and optimization delivery in Beetrack, loan platform services in Ellie Mae with Leniolabs and streaming platforms with NoCapShows in Globant. Mainly focused on the React ecosystem, I've worked with the Scrum methodology following Agile principles, using React and JavaScript. Now I'm working in InStride, helping companies to provide career-boosting education for their employees.

Summary of Qualifications

Proficient In:

- React
- JavaScript
- HTML
- Next.js
- Unit Testing
- GraphQL
- TypeScript
- Redux
- Sass
- RTL
- Git

Languages

- Spanish (native)
- English (c1, advanced)

Career History

Globant, Santiago, Chile jun. 2021 – Present

Web UI Developer

- Helped NoCapShows ™ set a streaming platform service using Next.JS, GraphQL and React.
- Built several UIs to help users to manage their purchased shows and access them.
- I've been working with several Globant Labs teams and helping them build services like DefineDNA for organization values identification and Globant Booking as an internal product.
- I'm part of InStride, a service that enables employers to provide career-boosting education to their employees. Also I've been learning TypeScript, GraphQL and Next.js due to the project requirements.

LENIOLABS, Santiago, Chile nov. 2018 – jun. 2021

Front-End Developer

- Finished several projects for Ellie Mae: Tasks UI and Admin UI, the first one for tasks workflow inside Encompass, the main Ellie Mae app for loan management, the second one as a back office app for the frontend dashboard.
- Helped Ellie Mae and Leniolabs teams besides my main team (Helped in DimSum bugs hunting)
- Learned Unit Testing and some Integration Testing.
- Learned Hooks and Sagas.

Beetrack, Santiago, Chile jun. 2018 – nov. 208

Front-End Developer

- Helped build the Plan Pro main maps view with the help of my front-end leader.
- Fix and upgrade Beetrack Widget, used in some retail companies (see Falabella, Paris in Chile) for shopping tracking and upgrade it to some ES6 features.
- Learned about CSS architecture (BEM/Atomic Design).

Education

INACAP, Santiago, Chile mar. 2021. – present

Programmer Analyst

Simón Bolívar University, Caracas, Venezuela nov. 2014. – feb. 2017

BS, Computer Engineering
