HOBBIES

PROFILE

Passionate Software Engineer, independent with a mainly large experienced in various startups. Over ten years since my first line of code. This marked my personal routine between sport and techs.

EMPLOYMENT HISTORY

Integration Engineer at Paperless SpA., Santiago
July 2014 — November 2014

Incorporate and update retail sale's stores for them to generate tributary electronics documents such as invoices and bills.

Freelancer, Santiago
October 2014 — Present

In parallel to my incorporation to Paperless, begins my jobs as a Freelances, making jobs for customers as project manager, taking requirements, design, ideas and mockups. Building and developing with documentation and such.

Software Developer at Zooft Company SpA., Santiago
March 2015 — July 2015

Innovation and integration of internal development requirements with a large focus on improving their main web site at the time: therunningoat.guru. In that time we were participating in Founder Space.

Software Developer at Mifuturofinanciero SpA., Santiago
July 2015 — June 2016

Confection of the idea that revolutionate the saving world: mimolido.com. A firstly hibrid app and then full native (Java) app that focus on break the way people use to make their monthly savings into their accounts. Also learning and using various financial concepts.

Software Developer at Shipit SpA., Santiago
September 2016 — May 2021

Micro service based structure into AWS using concepts of data messaging with RabbitMQ, Strong service integrations and web scrapping in order to work with our providers. Shipit is a company that serves of bridge between sales companies and last mile companies (like Fedex to US, here in Chile many others). Large implementation and learning of DevOps applying concepts of Scalability and Disponibility.

Chief Technology Officer at Datart, Santiago
July 2020 — Present

Emprendimiento, desarrollo e implementación de soluciones tecnológicas hechas a medida. Clientes como TUCASAOK (Desarrollo en ruby y java - android), además de un software para el rubro inmobiliario: Inmobilab.io con clientes en Paraguay y Chile. Continua en crecimiento.

Mine and my associated Startup, developing and implementation of custom tech solutions. Clients like TUCASAOK (mainly ruby with native android, java, development),

Gaming on PC, Skillful Soccer player, a little bit of running and healthy life (and... no so much, also)

LANGUAGES

English

in paraller of other softwares such our proudly [kinda uniq] inmobilab.io, a software for the automation of the real estate sector, with clients here in Chile and Paraguay. Still growing up :D.

FullStack Soft. Developer at Acid Labs SpA, Santiago
October 2021 — Present

As a full-stack, I participate from various monolites likes Preunic.cl and working with a Backoffice management software such as AimManager. Working with RoR and Javascript. My main job were to maintain those monolites and keep those out of bugs, hard thing to do, but allowing me to handle some presure and taking fast desitions.

EDUCATION

Informatics Engineer, Universidad Tecnológica de Chile Inacap, Maipú
March 2012 — October 2017
