Neuquén, Neuquén, Argentina

Key Expertise

- Performance Optimization
- Accessibility Standards
- Server-Side Rendering (SSR)
- Responsive Design

Summery

Experienced in proficiently crafting web and app development solutions, employing methodologies such as code minification, caching, and asynchronous loading. Committed to prioritizing accessibility, guaranteeing seamless user interactions across all projects. Demonstrated expertise in responsive design, skillfully crafting adaptable interfaces optimized for diverse devices. Moreover, I gained hands-on experience with server-side rendering frameworks like Gatsby.js and Next.js. I demonstrated a passion for fostering motivational environments that nurtured strong team dynamics.

Front-end Frameworks and Libraries Expertise

Proficient in utilizing a range of cutting-edge front-end frameworks and libraries, including **React.js, Gatsby.js, Next.js, Angular**, and **React Native.**

Styles Proficiency

Demonstrating advanced skills in **HTML, CSS,** and **SASS**, with extensive experience working with various **CSS frameworks.**

Unit Testing Competence

Proficient in implementing comprehensive unit testing strategies using industry-standard tools such as **Jest.js** and **React Testing Library.**

Tools Mastery

Experienced in leveraging powerful tools such as **TypeScript**, **Webpack**, and **ESlint**. Implemented **Figma** designs. Executed backend projects with **Docker** and **Kubernetes**.

Selected Work History

Nov 2021 - Present

Front End Developer @ Leniolabs LLC_, Remote, Argentina

Stack: Gatsby.js, Node.js, Handlebars, apple-news-publisher @ Mindbodygreen

Engaged in a comprehensive migration plan for the primary website project, with a focus on optimizing performance and functionality. The core infrastructure is developed using node.js with handlebars, encompassing backend capabilities running with **Docker**. Collaborated closely with the CTO and received guidance from UX/UI designers and the **Figma** designs to implement new features aligned with technical requirements.

Additionally, played a key role in making architecture decisions within the Gatsby project, specifically related to server-side rendering (SSR) for improved performance. Effectively employed the Shape Up agile methodology to streamline our work process.

Highlights of Achievements:

- Successfully migrated server logic from a node.js project to Gatsby API functions, enhancing scalability and maintainability.
- Implemented performance optimizations for server-side rendering (SSR) in Gatsby, resulting in improved loading times.
- Addressed accessibility (A11y) issues identified in an annual audit, incorporating necessary enhancements.
- Implemented Apple News platform designs utilizing Apple News Publisher, ensuring seamless integration with the platform's specifications.

Teacher @ Leniolabs_ Bootcamp 2023

As a front-end developer, my primary responsibility as a bootcamp instructor is to provide valuable insights and knowledge to students on HTML, CSS, JavaScript, and React.js. Furthermore, I find great value in sharing my professional experiences, as it enhances the learning process and provides real-world context to the concepts taught.

Jul 2021- Nov 2021

Front End Developer @ SOOFT Technology, Remote, Argentina

Stack: Next.js · styled-components · Node.js @ Fravega

Worked in a challenging role within after-sales web services, focusing on the implementation of new automation features for users post-sales requests. One of the major challenges involved integrating Google location services and client location services to gather comprehensive delivery information for sales purposes. The client-backed services were run using **Kubernetes** and **Docker**.

Collaborated closely with the Product Team and UX/UI team to meet project requirements and product workflow and designs in **Figma**. Engaged in paired programming sessions with the QA Team to ensure high-quality deliverables. Using Scrum methodology.

Nov 2020 - Jul 2021

Front End Developer @ Recursiva, Remote, Argentina

Stack: React.js - Redux Toolkit - Tailwind CSS @ Totalcoin

Led the development of a robust virtual wallet web application from inception to completion, utilizing React.js, Redux Toolkit for state management, and Tailwind CSS for seamless styling and user interface enhancements.

Stack: React Native - Angular @ GDM Seeds

Spearheaded the code refactoring process for mobile and web applications, enhancing code quality and maintainability. Collaborated with cross-functional teams to implement new features and optimize user experiences. Leveraged React Native and Angular frameworks to ensure efficient and effective development.

Nov 2019 - Jan 2020

Inter IT Auditor @ EY ARGENTINA (Ernst & Young), Ciudad de Buenos Aires, Argentina

Engaged in comprehensive systems audits to conduct risk analysis and ensure compliance with industry best practices and regulatory requirements.

Areas of Expertise:

- Access Management
- Change Management
- IT Operations Management

Methodology:

Utilized the EY Global Audit Methodology (EY GAM) to guide audit activities, ensuring a systematic and comprehensive approach to risk assessment and compliance.

Education

2019 - 2020

Universidad Tecnologica Nacional

Software Engineering Degree, unfinished

2012 - 2018

Universidad Nacional de Tres de Febrero

Environmental Engineering Degree, unfinished
