About me

I'm a software developer specializing in analytical processes and continuous enhancement. Dedicated to maximizing the utility of available resources, I consistently deliver scalable and efficient long-term solutions. My proficiency in AWS is complemented by a track record of leading development teams successfully. Rather than succumbing to pressure, I prioritize goal-oriented work, ensuring both the quality of my output and the achievement of specific targets.

Work experience

May 2021 - Present

Software Architect
Revolt
Client: Path Factory
I worked on the backend development of the new "Unified Content Library" system, which was built using Ruby on Rails, GraphQL, Apollo Federation, MongoDB, Elasticsearch, and KafkaConnect.
