Summary

I am a Tech Lead and a Senior Full-Stack Engineer with 17+ years working mainly with Java, Angular, Oracle, TypeScript, JavaScript and jQuery. I have worked in industries like government regulatory agencies, collection management and farming. I am expert at writing clean code, testing code, capturing user requirements, defining software architecture, estimating tasks and managing teams.
I consider myself a systemic, proactive, responsible, involved, organized and methodical person at work and personal life. I give my best in every project that I am involved in. As a result of my work in different companies and businesses, I have additionally developed several skills on myself about project management and business administration.

Soft skills

- I can learn quickly any topic, business area or tool.
- I have a systemic and methodical vision.
- I practice proactivity, responsibility, commitment and order in my job.
- I can communicate easily with people from any profession or organizational level.
- I can work adequately under pressure.
- I adapt myself when changes happen.

Personal details
