Hernan Matias Alonso

QA Automation Engineer at Royal Caribbean Group
Argentina

Extracto

Automated Tester & Web Developer

Experiencia

Royal Caribbean Group

QA Automation Engineer
septiembre de 2023 - Present (7 meses)
Remote

- Spearheaded the development, maintenance, and enhancement of automation test strategies to ensure comprehensive test coverage and improve overall testing efficiency.

- Leveraged TypeScript to write robust and scalable automation code, optimizing test execution and reducing manual effort.

- Implemented CI/CD pipelines using Bitbucket, streamlining the software delivery process and ensuring fast and reliable deployments.

- Pioneered the integration of AI technology into testing processes, initially focusing on UI testing and integrations with LivePerson chatbots.

- Currently leading the development of API test cases to directly validate the AI functionality hosted on Databricks and integrated with Gantry.

- Collaborated closely with cross-functional teams to integrate AI testing into the software development lifecycle, ensuring the accuracy and usefulness of AI-generated responses.

- Played a pivotal role in ensuring the quality and reliability of AI-driven features, validating the AI's responses to user queries and interactions.

- Actively involved in exploring and implementing innovative testing methodologies and tools to improve AI testing processes and enhance test coverage.

- Provided mentorship and guidance to team members on automation best practices, fostering a culture of continuous learning and improvement.

Newfire Global Partners
QA Automation Engineer
octubre de 2022 - septiembre de 2023 (1 año)
Global

- Developed and maintained an API backend automation framework using Jest and TypeScript, ensuring efficient and reliable test automation.

- Reviewed code written by peers to ensure high-quality and readable tests, providing valuable feedback and suggestions for improvement.

- Collaborated with different teams, addressing core endpoints and resolving issues to enhance overall system functionality.

- Proactively identified and reported bugs encountered during automation runs, contributing to the improvement of software quality and stability.

- Utilized GitLab to dynamically adjust testing environments and core data, enabling comprehensive testing across different scenarios and configurations.

- Worked within an Agile Scrum methodology, participating in sprint planning, stand-ups, and retrospectives to deliver automation tasks on schedule.

- Assisted manual QA team members in their tasks, supporting them in achieving sprint goals and maintaining a smooth testing process.

- Demonstrated effective communication skills, actively collaborating with team members and peers to ensure successful automation processes and streamlined workflows.

Mirigos, Inc
Senior QA Automation Engineer
mayo de 2021 - mayo de 2023 (2 años 1 mes)
Estados Unidos

- Led the implementation and utilization of Cypress for end-to-end (E2E), API, and UI testing, collaborating closely with the team to brainstorm the project's architecture and optimize our testing strategy.

- Acted as the Technical Lead (TL) for Cypress projects, providing guidance and support to the team, consolidating a robust codebase, and resolving any technical challenges encountered during the development process.

- Conducted interviews and assessed candidates for Cypress positions, ensuring the selection of qualified individuals to strengthen the automation team.

- Configured GitLab CI/CD and developed YAML files to streamline and automate the pipeline runs, enabling efficient testing and continuous integration.

- Proactively researched and explored innovative methods to incorporate additional tests into the projects, enhancing the overall test coverage and ensuring comprehensive quality assurance.

- Stayed updated with the latest plugins and versions of Cypress, conducting research and analysis to determine the best approaches and strategies for test automation.

- Leveraged Cypress for end-to-end (E2E) tests, ensuring the integrity and functionality of the entire system by simulating real user scenarios.

- Utilized Cypress for API testing, validating the accuracy and performance of backend APIs, and ensuring seamless communication between different system components.

- Employed Cypress for UI testing, conducting comprehensive checks to validate the user interface and user experience, ensuring consistent and user-friendly interactions.

Minted
Senior QA Automation Engineer

BlockFi
QA Automation Engineer
junio de 2020 - mayo de 2021 (1 año)
Nueva York, Estados Unidos

- Collaborated with the QA team to provide QA supervision for various projects and features in BlockFi's Web app and Mobile app.

- Utilized Cypress.io (JavaScript) to automate tests, ensuring efficient and reliable test execution, and integrated them with CircleCI for continuous integration.

- Participated in daily stand-ups with cross-functional teams to gain a clear understanding of upcoming product releases and changes, aligning testing efforts accordingly.

- Engaged in strategic planning based on BlockFi's vision and goals, contributing to the development of a comprehensive testing approach and roadmap.

- Created test scenarios to cover various use cases, ensuring thorough test coverage and identifying potential issues or gaps in functionality.

Phinx Lab
QA Automation Engineer
junio de 2020 - mayo de 2021 (1 año)
Buenos Aires, Argentina

- Served as a QA Automation Engineer for the main client, BlockFi, providing automation support for their projects and ensuring high-quality testing.

- Offered assistance and support to Phinx's projects, leveraging automation techniques and expertise to enhance their testing processes.

- Mentored team members, guiding them in the development of programming skills and best practices specific to Cypress.io automation.

- Automated test cases to meet the specific needs and requirements of the projects, optimizing testing efficiency and accuracy.

- Implemented Scrum methodology, participating in weekly meetings, daily stand-ups, and focused group sessions to maintain effective collaboration and project alignment.

Banco Galicia
QA Automated Analyst - FontEnd Developer
julio de 2018 - abril de 2020 (1 año 10 meses)
Argentina

- Worked using agile methodology in a one-week sprint, ensuring efficient project management and timely delivery of tasks.

- Focused on increasing the online conversion of insurance products and loans, implementing strategies and conducting tests to optimize user experience and drive conversions.

- Conducted manual testing and created automated test cases to ensure the quality and functionality of the applications.

- Collaborated closely with Google Analytics, leveraging its insights and data to inform decision-making and improve performance.

- Assisted with MySQL queries and statements, ensuring accurate data retrieval and manipulation for analysis and reporting purposes.

- Supported the UX team in delivering affordable prototypes for development, contributing to the creation of user-friendly and visually appealing interfaces.

- Utilized HTML5, CSS, and JavaScript for front-end development, implementing responsive designs and interactive elements to enhance the user experience.

Galicia Seguros

Sr Quality Assurance Tester

junio de 2017 - abril de 2020 (2 años 11 meses)

Ciudad Autonoma de Buenos Aires, Argentina

- Collaborated with an organized team, following short-term and long-term schedules to deliver high-quality testing results.

- Played a key role in the successful full company Core migration, enabling the company to gain a competitive edge in the market.

- Analyzed start-up project documents to understand project requirements and define appropriate testing strategies.

- Distributed tasks effectively within the testing team, ensuring efficient resource allocation and timely completion of testing activities.

- Created and executed comprehensive test cases, ensuring thorough coverage and accurate validation of software functionality.

- Utilized Jira for bug reporting, effectively documenting and tracking issues throughout the software development lifecycle.

- Interacted with clients for User Acceptance Testing, ensuring their requirements and expectations were met.

- Trained new co-workers in the testing team, providing guidance and support to facilitate their onboarding and contribute to their professional growth.

- Took the initiative to learn and share knowledge about new QA testing tools, helping the team adapt to the latest industry trends and technologies.

- Recognized by the Testing Chief for demonstrating exceptional programming skills and delivering fast and high-quality automated testing cases.

- Exhibited a fast learning ability and a passion for programming, contributing to continuous improvement and staying up-to-date with the latest advancements.

- Worked in both Scrum and Kanban methods, adapting to the team's chosen agile frameworks for effective project management.

HS//Consulting
Desarrollador Jr.
noviembre de 2016 - junio de 2017 (8 meses)
Ciudad Autonoma de Buenos Aires, Argentina

- Worked under ISO 9001 standards, ensuring adherence to quality management practices and contributing to continuous improvement.

- Collaborated closely with the development team, learning from experienced colleagues and leveraging their expertise to enhance skills and knowledge.

- Created and executed comprehensive test cases, playing a crucial role in delivering high-quality software solutions to clients.

- Served as a front-end developer, designing and implementing web pages and web applications to meet client requirements.

- Modified and improved the aesthetics of client websites, ensuring visually appealing and user-friendly interfaces.

- Trained new co-workers on testing methodologies and fundamentals, providing guidance and support to facilitate their integration into the team.

- Utilized HTML, CSS, and JavaScript coding to implement front-end features and functionality.

- Assisted the development team with tasks related to .NET programming, contributing to the successful delivery of projects

AIG
Quality Assurance Tester
octubre de 2015 - noviembre de 2016 (1 año 2 meses)
Ciudad Autonoma de Buenos Aires, Argentina

- Created and executed test cases to ensure comprehensive test coverage and validate the functionality of software applications.

- Reported bugs and issues to the development team, providing detailed information for effective troubleshooting and resolution.

- Developed automated tests for the company's core application, improving testing efficiency and accuracy.

- Interacted with users during User Acceptance Testing, assisting them in understanding and navigating the software.

- Thrived in high-pressure and tight schedule environments, consistently delivering high-quality test results.

- Received recognition from the manager for successfully meeting the demanding needs of clients, improving the relationship between the companies.

- Fostered a friendly working atmosphere, recognized by co-workers for creating a positive and collaborative team environment.
