Experience

Lead Frontend Engineer, CareLinx by Sharecare: Remote, USA — November 2020 to February 2024

- Led the frontend architecture, optimizing a tech stack built with Webpack and Node.js, improving scalability and performance.
- Reviewed and merged PRs, ensuring code quality and alignment with project standards.
- Mentored and trained the frontend team on best practices, particularly in testing, resulting in increased team efficiency and fewer production bugs.
- Creation of Bitbucket Pipelines and Github Actions pipelines for CI/CD reducing deployment times.
- Development of Next.js and React.js projects with Redux.
- Development of React Native development with Mobx.

Lead Frontend Engineer, Shipit: Santiago, Chile — February 2019 to October 2020

- Spearheaded the development of a new application from the ground up, utilizing Next.js for server-side rendering (SSR), Redux for state management, and Ant Design to enhance the UI.
- Designed and implemented a real-time communication system with a socket server, using Node.js, Redis, and Socket.io, ensuring seamless data flow and low-latency interactions.
- Orchestrated Docker-based environments for development and production, enabling smooth CI/CD pipelines and reducing deployment errors.
- Collaborated with the backend team, troubleshooting and resolving bugs in Ruby on Rails to ensure a cohesive, fully functional application.

Full Stack Developer, Cooldata Telemetría: Viña del Mar, Chile — July 2013 to July 2018
