Buenos Aires, Argentina

EXPERIENCE

Senior Software Engineer

Deviget

01/2020 - Present | Buenos Aires

Design, development and maintenance of Golang microservices that build the Stark project backend ecosystem. The team is accountable for the entire development process, including architecture, infrastructure, QA, CI/CD, deployments, releases and production support.

Staff Software Engineer & Tech Lead

AppDirect

01/2017 - 01/2020 | Buenos Aires

Tech lead for a 6 people scrum team. Coaching and training for SSr. and Sr. devs.
Screen and interview candidates for open positions.
Design, development and maintenance of Java microservices connecting the company main product (apps marketplace) with strategic ISVs such as Microsoft, Google, AWS, DocuSign and Autodesk.

Semi Senior Software Engineer

Open English

10/2013 - 10/2016 | Buenos Aires

Development and maintenance of the payments and recurring charges subsystem for the online courses, ranging from the store frontend to the microservices that form the backend, integrated with many payment gateways, international and local.

Semi Senior Software Engineer

Tecnet

08/2012 - 10/2013 | Buenos Aires

Online desktop application development. Bugfixing and support.

Junior Software Engineer

Globant

10/2011 - 08/2012 | Ubicación

RESTful webservice development and QA tasks. Interaction and team-up with client-side developers. Support and bugfixing.

SIDE PROJECTS

Home automation

I've developed several open source JavaScript and TypeScript libraries that allow some 3rd party devices to integrate (using other open source software) with Apple HomeKit. Some of these "plugins" are widely used worldwide.

PROFILE

Experienced backend software engineer specializing in building scalable microservices in Golang, NodeJS and Java.

Proven leadership skills as a tech lead, driving team success in fast-paced environments.

Eager for new challenges that require deep technical expertise and strategic thinking.
