WORK EXPERIENCE

Accenture **Feb. 2024 – Present**

DevOps Engineer *Remote*

- Accenture is a global professional services company with leading capabilities in digital, cloud, and security.
- As a DevOps Specialist, I oversee our tech strategies, product scalability, elasticity and team organization. Design and implement DevOps strategies to enhance application delivery.
    - **My Role:** Manage a team of 5 developers in daily tasks, providing guidance on product functionality and strategies. Recommended and implemented improvements to enhance optimization.
    - **Stack:** AWS; EKS; Azure; Azure Functions; Azure Devops; Azure DevOps CICD; HashiVault; Terraform; Powershell; JavaScript; Python; Datadog; Git; Jira.

Nimbux911 **Aug. 2024 – Nov. 2024**

AWS Solutions Architect / Cloud Engineer *Remote, Contractor*

- Nimbux911 provides cloud-based solutions to companies according to their needs to guarantee the continuity and efficiency of their business.
    - **My Role:** I focused on designs and deploy scalable, reliable, and cost-effective cloud solutions on AWS. I assessed client requirements, provided architectural recommendations, and ensured the best practices for security and performance were met.
    - **Stack:** AWS; Github; Github Actions; Jenkins; Terraform; Terraspace; Bash; Python; Kubernetes; MongoDB; PostgreSQL.

Interbanking **Apr. 2023 – Feb. 2024**

AWS DevOps Engineer / SRE *Remote*

- Interbanking offers a SaaS platform for streamlined, secure financial transactions and payments between businesses and financial institutions.
    - **My Role:** Served as focal point across 3 teams, providing DevOps support with automation, optimization, and improvements. Built a serverless application from scratch called Inversiones.
    - **Stack:** AWS; Gitlab; GitlabCI; Terraform; Nexus; Bash; Python; Openshift; Docker; Prometheus/Grafana.

JalaSoft **Sep. 2021 – Mar. 2023**

DevOps Engineer *Remote, Contractor*

- Jalasoft is a software development company that specializes in providing custom software solutions and IT consulting services across various industries.
    - **My Role:** Worked across three projects. Supported teams in deployment, automation, infrastructure and developing management.
    - **Stack:** Azure; AWS; Terraform; Kubernetes; GoCD; Octopus Deploy; PowerShell DSC; Docker; GitLab CI; Java (Springboot); Javascript (React); Jira (Scrum).

DevOps Bootcamp | Sep, 2021 – Feb, 2022

- Gained hands-on DevOps experience in addition to my BackEnd Developer knowledge.

Emblue **Mar. 2021 – Sep. 2021**

BackEnd Developer *Remote*

- EmBlue is a SaaS marketing platform that offers solutions for email marketing and SMS marketing.
    - **My Role:** Design, improve, and adapt technical solutions through the development and maintenance of product functionalities to ensure their proper functioning and quality.
    - **Stack:** C#; Javascript (React); Python; SQL; BitBucket; Datadog; Jira (Scrum).

EDUCATION

University of Buenos Aires **2018 - 2021**

Major, Computer Science *Argentina*

- Designing, developing, and optimizing software and systems to solve complex problems, drive innovation, and enhance technology across various industries.

ORT High School **2012 - 2017**

Major, Electronics Technician *Argentina*

- Skilled in computer assembly and repair, network cabling, soldering and constructing electronic components, and programming with PLC systems, Arduino, and Android Studio.
