Jesús García Santos

Backend Web Developer

Pontevedra, Spain

jesus.gs.83@gmail.com

About Me

I'm a backend web developer with over a decade of experience building and maintaining robust web applications. My background spans from freelance development to leading projects and contributing to teams in fast-paced, agile environments. I enjoy solving complex problems with clean, scalable code and am passionate about continuous learning and collaboration.

Core Skills

- Backend web development
- Web application architecture
- Strong creative problem-solving skills
- Proactive learning
- Growth mindset

Professional Experience

Backend Developer | Improving (formerly Leniolabs)

Oct 2024 – Present

Joined the Improving team after the Leniolabs acquisition. Currently focused on Ruby on Rails backend development using modern technologies and contributing to the evolution of internal platforms.

Web Developer | Improving (formerly Leniolabs)

Dec 2019 – Oct 2024

Worked on a variety of web projects, emphasizing backend services and system integrations.

Tech stack includes: Ruby on Rails, HTML/5, CSS/3, SASS/SCSS, JavaScript, jQuery, PostgreSQL, MySQL, REST-API Development, Linux CLI (Bash), Docker, Git

Technical Consultant | Don Cicleto

Apr 2015 – Present

Provided ongoing technical support and development services for mobility and sustainability projects.

Project Manager | AgileDevers

Jul 2013 – Dec 2021

Oversaw web development projects, coordinated teams, and ensured timely delivery of client solutions.

Web Developer | Freelance

Jan 2013 – Dec 2021

Developed full-stack web applications for a wide range of clients, managing all stages of the development process from planning and MVP creation to deployment and scaling. Provided long-term support and feature expansion for multiple startups — many of which remain active today and have successfully scaled their operations globally.

Tech stack includes: Ruby on Rails, HTML/5, CSS/3, SASS/SCSS, JavaScript, jQuery, PostgreSQL, MySQL, REST-API Development, Linux CLI (Bash), Docker, Git.

Web Developer | CT3 Ingeniería

Sep 2011 – Sep 2012

Worked on interactive apps and admin panels for industrial clients using technologies like HTML5, PHP, .NET, JavaScript, and SVG.
Key Projects:
- RealPlant3D (HTML5, PHP, CSS, Krpano, SVG, JavaScript)
- RealPlant Admin (ASP.NET, HTML5, CSS, JavaScript)

Education

Universidad Politécnica de Madrid
