Full stack Developer
Hernán Torres

PROFESSIONAL SUMMARY

Experienced software developer with over 10 years of expertise across diverse industries. Specialized in the full software development lifecycle, with proficiency in backend, frontend, and cloud-based architectures. Proven experience in AWS Event-Driven Architectures, designing and maintaining scalable cloud infrastructures. Passionate about learning and delivering innovative solutions aligned with industry trends.

TECHNICAL SKILLS

React.js	Advanced	6+ years	React native	Intermediate	3+ years
HTML5, CSS, SASS, SCSS	Advanced	6+ years	Node.js	Advanced	6+ year
JavaScript	Advanced	6+ years	PHP	Advanced	8+ years
TypeScript	Intermediate	5+ year	Docker, Terraform, AWS	Intermediate	4+ years
Unit test, integration test and E2E test	Advanced	5+ years	CI/CD		

EDUCATION

Computer Science
John F. Kennedy University.

EXPERIENCE

Senior Software Engineer

LenioLabs *(March 2024 – Present)*

- Contributed to the development of a financial management product, collaborating with a global client (Canada, USA, Europe).
- Built application architecture from scratch using Next.js (MedusaJS) and React.js.
- Developed scalable backend solutions using Node.js and Serverless Framework.
- Integrated AWS services: Lambda, API Gateway, EventBridge, SNS, SQS, Step Functions.
- Automated cloud infrastructure using Terraform and AWS CDK.
- Managed event-driven workflows with AWS Step Functions.

Tech Stack: NestJS, ReactJS, Node.js, Serverless Framework, AWS Lambda, API Gateway, EventBridge, SNS, SQS, Step Functions, AWS CDK.

Senior Software Engineer

Freelance *(March 2020 – March 2024)*

- Developed web and mobile applications using Symfony, Laravel, VueJS, ReactJS, React Native.
- Designed and implemented microservices-based architectures.
- Integrated AWS services for scalable computing and storage.
- Built a clinical diagnostics API using Next.js 10.

Tech Stack: PHP (Symfony, Laravel), JavaScript (Node.js, Express, Next.js, React.js, React Native), AWS, GitLab, Docker, Firebase, Okta.

Backend Developer (Freelance)

Tapi *(May 2022 – Feb 2023, 8 months)*

- Developed event-driven integrations using AWS EventBridge, API Gateway, SQS, DynamoDB, S3, EC2.
- Implemented serverless solutions with Node.js, Python, and PostgreSQL.
- Applied TDD to ensure code quality and maintainability.

Tech Stack: Node.js, Python, AWS (Lambda, EventBridge, API Gateway, SQS, DynamoDB, S3, EC2), Docker.

Tech Lead

Siembro *(January 2020 – May 2022)*

- Led the development of system applications and ensured best development practices.
- Integrated Laravel Dusk in CircleCI to reduce production errors.
- Mentored junior developers and managed cross-functional collaboration.

Tech Stack: PHP 7.3, Laravel 6, JavaScript, VueJS, ReactJS, Docker, Bitbucket, Google Auth.

Senior Full Stack Developer (Freelance)

(2016 – 2020)

- Built APIs and customer-facing applications using JavaScript frameworks.
- Developed RESTful APIs and managed deployments.
- Worked closely with system administrators for infrastructure management.

Tech Stack: Node.js, JavaScript (React.js, Vue.js), PHP, Docker, AWS Lambda, MySQL, NoSQL (DynamoDB).

Full Stack Developer

Ixpandit Fintech Group *(August 2016 – December 2019)*

- Designed, developed, and implemented architecture solutions.
- Integrated third-party APIs (Amazon, Uber, Cabify) for customer classification.

- Conducted research and development on web scraping with Node.js.

Tech Stack: PHP, Python, Node.js, Laravel, Lumen, Django, Docker, AWS.

Full Stack Developer

Metrotel *(November 2016 – August 2017)*

- Developed and maintained internal web systems.
- Managed network equipment through PHP applications using Telnet protocol.
- Led a two-person development team.

Tech Stack: HTML, CSS, JavaScript, Angular 2, PHP, Laravel, MySQL, Apache, SVN, Linux (CentOS).

Full Stack Developer

Sols Technologies *(November 2015 – November 2016)*

- Led full development and maintenance of a ticket management system.
- Developed new applications using PHP and Java.

Tech Stack: PHP, Laravel, PostgreSQL, Java, Struts, Maven, Docker.
