# Miguel Angel Munoz

Senior Consultant at LabsXD
Argentina

## Summary

I am in charge of the direction, standards, performance, and ongoing health of the Application Development and I ensure that it complies with the Application Requirements and Roadmap.

- Building functionalities in a sandbox with Salesforce and Vlocity framework.
- Bug Fixing and test classes development.
- Direct interaction with end-users to analyse project objectives and capability requirements, including specifications for user interfaces, customised applications.
- Connecting business processes with product/technical solutions.
- Data modelling.
- Application Architecture.
- Systems analysis and design.
- Presenting implementation options and proposals for business requirements.
