Semi Senior Software Developer – santisanchezavalos@gmail.com

https://www.linkedin.com/in/santiago-sanchez-avalos/

Greetings! I'm Santiago and I've been working as a full stack developer for many years.

Throughout this time I've been acquiring knowledge in many technologies in order to increase my technical skills, but I personally believe my strengths also involve soft skills such as good communication and conveying confidence with people I work with.

Professional experience:

(Feb 2019 - Present) **Full Stack Developer** at **Connectis Argentina**

- **Telefónica Tuenti**: portabilidad.tuenti.com.ar
  Co-leader of a self-managed team, following SCRUM principles to deliver value iteratively across different Sprints. In constant communication with the Product Owner to relieve product's needs.
  Development of Java Application guaranteeing a robust and maintenance friendly code.

  Integration with APIS from logistic companies such as Andreani and E-Logística.

(Jun 2019 – Present) **Product Manager** at **AfterDev**

- **Private client's projects**: afterdev.com.ar
  Own venture founded with two colleagues.

  From setting up several environments in Linode servers to developing web applications for different requirements to fulfil.

(Aug 2018 – Dic 2018) **Full Stack Developer** at **Espin Labs Argentina**

- **Decrypto cryptocurrency exchange platform**: decrypto.com.ar
  In charge of writing code in a backend Java Application and improving HTML views with the use of Angular 4.

Education:

2016-2018 - UCES (Universidad de Ciencias Empresariales y Sociales)
Technician in systems programming

2011-2014 - Palermo Chico High School
Bachelor with orientation to social sciences

Languages:

- Spanish, Native proficiency
- English, Full professional proficiency
  - First Certificate
  - IB Language

Professional Qualifications:

Selection of programming languages and technologies:

- Java (2 years): JDK 8, 11. Spring Boot, Data, Security. Hibernate as ORM. Exposing and consuming REST APIS. JUnit and Spring runners for TDD approach.
- Frontend (2 years): HTML/CSS/JS/JQuery.
- Vue JS (1 years): Frontend experience with Vue setting up web apps.
- Angular 4 basics.
- Docker basics for containing applications, simple pipelines with Gitlab runner's configuration involving automatic tests, continuous integration, code checkstyle and review and automatic deployments/releases.
- Linode experience as DevOp role.

Databases:

- Relational Databases: H2DB, MariaDB, HSQLDB and MySQL
- Indexing engine: Elastic Stack (ElasticSearch, Kibana, Logstash and Beats)

Good Practices:

- Unit testing, TDD.
- Three-layer architecture.
- Microservices-oriented systems development.
- Simple & Easy documentations.

Social Skills:

- Social speech practice as IT-Support and client-assigned product owner as agile developer.

- ➔ OOP and functional programming paradigms experience.
- ➔ Standard DevOps skills.
- ➔ Clean code versioning.

Other Technologies:

- ➔ Version control: Git.
- ➔ Remote Control: SSH.
- ➔ Experience providing training at Connectis-Argentina with Junior developers of own team.
- ➔ Agile Methodologies. Scrum Master experience and XP approach.
