EXPERIENCE

Ascend Software

August 2022 - Ongoing

Ascend Software is a company that specializes in business process management (BPM) and automation solutions. Its main objective is to help organizations optimize and streamline their operations through the implementation of innovative technologies.
In this opportunity, Sebastian worked on several features related to the main product of the website, which is a web tool that allows the adjustment/editing of documents previously scanned by the OCR Back-end (invoice processing).
The system was built using Vue.js/Vuetify as the main FE Tech and .NET core C# as the main BE TECH. Lastly, he worked on the development of new UI features and maintenance of the back-end layer.

Role: .Net Software Engineer
Technologies: .Net, C#, HTML, CSS, ASP .Net, JavaScript, Angular, SQL Server, MySQL, PL SQL, Oracle SQL, MVC, JQuery.

Mercado Libre

August 2020 - August 2022

Mercado Libre is an Argentine company dedicated to the electronic commerce platform. It has operations in countries throughout Latin America, such as Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Ecuador, Mexico, Nicaragua, Panama, Paraguay, Peru, and Venezuela, among others. Users can sell and buy both new and used products at a fixed or variable price, plus private services are offered.
On this occasion, Sebastian was in charge of developing new features and extending existing ones in an existing internal web-based tool.
He also implemented changes to the backend APIs and connected the current backend implementation with external service APIs.

Role: .Net Software Engineer
Technologies: Golang, React.js, Node.js.

TheMLS.com

March 2019 - August 2020

The MLS™ services more than 15,000 real estate professionals in Southern California. The MLS™ is recognized nationwide as being at the forefront of technology with its wholly owned and operated MLS software and for its excellent customer service.
In this opportunity, Sebastian worked on maintenance tasks and worked on development tasks for the main website of an existing real estate management company.

Role: .Net Developer
Technologies: .Net, C#, ElasticSearch, AngularJS, Angular 8, and SQL Server.

ITA Group

November 2016 - March 2019

ITA Group delivers custom-crafted global engagement solutions that motivate and inspire event attendees, employees, channel partners, and customers. With operations globally and throughout the U.S., ITA Group designs unique business strategies and experiences that create connections, motivate audiences, and drive purposeful change for some of the world's biggest brands.
On this occasion, Sebastian worked on the migration of a monolithic legacy system already built on a tightly coupled architecture. The system was migrated to a state-of-the-art microservices approach.

Role: Software Developer
Technologies: C#, .Net Core, API, Entity Framework, SQL Server Graph, Service Fabric. Azure (Blob storage, Pipeline CI).

Hospital Privado

March 2016 - November 2016

Hospital Privado is a hospital that is not owned by the government, including for-profit and nonprofit organizations. Financing is provided by the patients themselves, by insurers, or by foreign embassies.
On this occasion, Sebastian performed development tasks of new functionalities in a web of pharmacological interaction testing.

Role: Software Developer
Technologies: C#, AngularJS, .Net Framework 3.5, VB.Net, Entity Framework (DB First), SQL Server.

Hewlett Packard

March 2016 - November 2016

Hewlett Packard Enterprise Company is an American business information technology company with headquarters in several countries around the world. Dedicated to the manufacture and commercialization of hardware and software in addition to providing computer-related support services. The company was founded in 1939 by William Hewlett and David Packard and was engaged in the manufacture of electronic and laboratory measuring instruments.
On this occasion, Sebastian worked on the maintenance and development of the main site for the Universal Music repertoire rights management system.

Role: .Net Developer
Technologies: C#, .Net framework 2.0, MVC3, Entity framework.

Globant

May 2009 - March 2016

Globant is a digitally native company where engineering, design, and innovation meet to reach scale. With more than 20,000 professionals, they are present in 18 countries working for companies such as Google, Rockwell Automation, Electronic Arts, and Santander, among others. Globant leverages the latest technologies and methodologies to help organizations to transform themselves internally in every aspect. Their goal is to transform the digital world with world-class opportunities for talent around the globe.
Sebastian worked on the maintenance and new development of various websites for Deloitte USA, one of the company's key clients. His focus was on a survey-type web application that could be tailored to different tenants. He utilized ASP.NET, C#, and SQL Server as the main technologies for this project.

Role: Software Engineer
Technologies: Net, C#, SQL Server
