Andres Felipe Redondo Peñaranda

Technical Team Lead at Santander Tecnología Argentina

Argentina

Extracto

Performance focused engineer. Used to work under high performance software delivery lineaments, I am aware of the importance of the flexibility required to be able to make changes in order to achieve success with commitment. Experience has shown to me that technology is the vehicle of successful ideas and products. That's why I am convinced that what the way to solve humanity problems is thru ideas, not wires.

Experiencia

DondoCorp

Chief Technology Officer and Founder

enero de 2019 - Present (2 años 7 meses)

Argentina

Santander Tecnología Argentina

Technical Team Lead

noviembre de 2020 - Present (9 meses)

Buenos Aires, Buenos Aires Province, Argentina

I am responsible for leading the development team in order to design, develop and support APIs for the Mutual Funds Engine.

We are hiring!

Rappi

1 año 11 meses

Technical Lead

enero de 2019 - noviembre de 2020 (1 año 11 meses)

Capital Federal, Argentina

While at Rappi I managed to leverage regionally:

Restaurant's Vertical revenue up to 10% ,

User base growth by a 7%
and designed a light weight development process which cut costs and time up to 30%. Allowing faster and simpler integrations with partners.

Software Engineer
enero de 2019 - enero de 2020 (1 año 1 mes)
Argentina

I am working closely with the VP of engineering, product manager, and business stakeholders to improve our products every day.

My current responsibilities:
+Develop and deliver new product features
+Improve engineering processes and tools to increase team effectiveness
+Work across both technical and business focused teams to deliver value to our users
+Review pull request of others
+Deploy Beta versions for testing and work closely with QAs
+Deploy final versions to production

Spredfast
Senior Java Developer
abril de 2016 - enero de 2019 (2 años 10 meses)
Capital Federal, Argentina

Working in the development of an enterprise social media management platform (www.spredfast.com); a single page app made on CanJS with a Spring MVC based webservices backend and a Java microservices layer backed with Cassandra and ElasticSearch.

Close interaction with other development teams, devops and product management.

On a daily basis I am responsible for:

+Detailed component design and documentation.

+Design with non-functional requirements in mind, generating scalable and performant designs and code.

+Develop back-end components and logic.

+Produce high quality testable code according to specifications.

+Generate automated unit and integration tests to validate the components produced.

+Participate in software design/code reviews to ensure quality and adherence to company standards and usability guidelines.

+Mentor and collaborate with other team members.

+Actively participate in the software development process from design to releas.

+Collaborate in the maintenance of the CI pipeline.

Hewlett-Packard
2 años 3 meses

Application Consultant and Developer II
febrero de 2015 - abril de 2016 (1 año 3 meses)
Buenos Aires Argentina

As a Full Stack Developer for the American Airline's Business Extra Application I've got the opportunity to create high precision solutions regarding the business rules. This is reflected in the scope and approach of the solutions that are designed and implemented. As a random fact, I have to make sure the processing time doesn't increases in more than the 10%.

From a technical point of view the technologies involved were Java 8, the gui flavored with Spring, to analyze the interactions google analytics, and stored using oracle 11g.

Application Management Service Delivery II
febrero de 2014 - febrero de 2015 (1 año 1 mes)
Buenos Aires, Argentina

As application developer I am in charge of the Development and Maintenance inside AACoRN's Merchandising Department. AACoRN is comprised of a set of multiple sub applications which are integrated but feature specific functionalities.
In order to keep innovating and increasing companie's value, as a team we have to think out of the box and develop lateral thinking solutions, guaranteeing the industry's demands (quality, experimentation, etc.).

Prosegur
Web and Database Developer
agosto de 2013 - febrero de 2014 (7 meses)
Villa Martelli, Argentina

Responsible of the intranet portal end to end. The projects carried on were developed for serveral countries like Argentina, Uruguay, Chile, Colombia and Peru. Those projects were developed under the Meta4 framework.

Mundo Pato, Inc.
Java Developer
febrero de 2013 - junio de 2013 (5 meses)
Bogotá, Colombia

As a freelancer, developed part of the Unitus IT application which is part of an integral education system for special needs children. The tasks were related to increasing functionality, security, and patterns application. This was a 3-tier development; Business logic, Views and Database.

Universidad de los Andes
Data Consultant
enero de 2012 - febrero de 2013 (1 año 2 meses)
Bogota, Colombia

The University contracted my services to manage two situations they were facing with a custom application that was developed to support a new product. They had to fix some issues with the operation and wanted to increment the functionality. This project was developed using Java and a industry's specific framework.
