Matias Melograno

Engineering Manager at Split
Buenos Aires

Extracto

I am a developer with 5+ years of experience.
I have mostly focused on the Back-end side. I started working with Java and then I moved to JavaScript development under NodeJs for several years. Then, I have worked as a SDK developer under several languages (Go, Python, PHP, JS) and microservices for integrating those SDKs. Currently, I am working as Engineering Manager.

I have also worked with Amazon Web Services, ElasticSearch, MongoDb, Docker and Redis.

I am very passionate about learning new technologies and working in teams. I have worked under Agile Methodologies.

Experiencia

Split
Engineering Manager
julio de 2018 - Present (3 años 5 meses)

SDKs Team. Developing and maintaining Split Go, Python, PHP SDKs, Split Synchronizer (Go, Split Evaluator microservice (Node + Express), and microservices used for integrating our SDKs.
