Martín Cruz Barutta

Front End Developer en BFA Industries
Buenos Aires y alrededores

Extracto

I am a software developer with more than 10 years of experience. I have worked in the IT area developing and applying my knowledge in automation companies oriented to the metallurgical industry such as VAI-Ingdesi and Siemens.

In my first jobs I worked as a programmer using Microsoft .Net and SQL Server technologies, making implementations for steel industries such as Sterling Steel Company (USA) and Acindar Arcelor Mittal Company (Argentina).

My last works at Siemens, were linked with the consultancy and the development of customizations (in Oracle PL / SQL languages) for laboratory information management systems (LIMS) within the industrial environment. The successes include projects, start-up and training of large-scale clients, in companies such as Aluar (Argentina) and Votorantim (Brazil-Peru). Previous experience includes continuous communication and advice (in English) from consultants based in Belgium with extensive experience in the LIMS product. I have also had the opportunity to meet countries (such as Netherlands, Peru, Brazil and Spain) for different circumstances such as training, teamwork and start-up.

I am an enthusiast in what I like most about programming and the world of new technologies. My colleagues know me as a passionate person, with great dedication and willingness to work, which can always be trusted for new challenges.

I can work alone, but I feel better and more comfortable if I do it in collaboration with a work team exchanging ideas.

At Cognizant Softvision (CSV) I've been participated as a Sr. React developer in React.js for several projects from scratch including a loyalty platform for the largest deal-sharing community of the USA

and a Real Time Optimization system for a largest producer of liquefied natural gas.

Also I have the opportunity to lead a team of developers, preparing and presenting proof of concepts on several ideas to stakeholders, providing direction on what is the best technology that fits, by performing research and use into new market technologies.

Today my mind is located at my current work BFA industries, where I hope to grow up in my professional career.

Some of my web works can be seen in my portfolio (http://qnapts251mcb.myqnapcloud.com/)

Experiencia

BFA Industries
Front End Developer
agosto de 2020 - Present (1 año 8 meses)

Sr. React developer for a new personal care brand with fun extra essentials for the face and body, perfect to liven up any bath routine.
Member of a team created for a new beauty subscription, collaborating building new components from scratch required from the product side, also interacting with other teams / services to retrieve the expected data. Working closely to improve subscription experience (including acquisition and cancellation flow, upsell module, account billing, shipping information) that undergoes changes at all times from business perspective. Discussing which is the best technology for each new requirement and trying to follow best practices, keeping the code much cleaner and simpler to be prepared for new redesigns, and building incrementally but solving the right customer's needs along the way.

Technologies: javaScript(ES6) – React.JS – Unit Tests (React Testing library) - Typescript - NextJS - GraphQL - Apollo - Styled Components – YARN – NPM – Git/GitHub – Jenkins - Jira - Agile methodologies (Scrum)

Softvision
Front End Developer
abril de 2019 - julio de 2020 (1 año 4 meses)
Argentina

Tasks and Responsibilities:
Sr. React developer in React.js for several projects from scratch including a loyalty platform for the largest deal-sharing community of the USA, and a Real Time Optimization system for a largest producer of liquefied natural gas. Also helping as a reviewer of PRs for an external vendor in the implementation of a new USA healthcare website.
Lead a team of developers, preparing and presenting proof of concepts on several ideas to stakeholders, providing direction on what is the best technology that fits, by performing research and use into new market technologies.
Technologies: javaScript(ES6) – React.JS – HTML5 (DOM) – CSS3 (Flexbox - Grid - Sass) – AJAX (Http Requests) – REST services – JSON – Bootstrap – Webpack – NPM – Git/GitHub-GitLab – Agile methodologies (Scrum)

GlobalLogic
Front End Developer
septiembre de 2018 - abril de 2019 (8 meses)
Argentina

Tasks and Responsibilities: Support and maintain an USA e-learning platform developed in React.js
Technologies: javaScript (React.JS) – HTML5 – CSS3 –Bootstrap – Webpack – NPM – Git/GitHub

Freelance
Front End Developer
enero de 2017 - agosto de 2018 (1 año 8 meses)

Function Description: Training, research and development in React.JS, going to the world of new web technologies
Technologies: JavaScript, CSS3, HTML5, Bootstrap, JQuery, React.JS

Vanderlande
Software Engineer
septiembre de 2016 - diciembre de 2016 (4 meses)
Argentina

Tasks and Responsibilities: Maintain tasks, configuration and commissioning of WMS (Warehouse Management System)
Technologies: .NET C# - MS SQL

Siemens
SIMATIC IT UNILAB - Project Engineer
julio de 2009 - abril de 2016 (6 años 10 meses)

Argentina

Tasks and Responsibilities: Sr. LIMS (Laboratory Information Management System) developer, trainer, consultant, configuration, commissioning, sales support and business development
