Work Experience

Tech Lead / Scrum Master - Bose - Teracode - Tandil - March 2019 - February 2020
Leading a 7 senior engineer team. My responsibilities where creating new processes for communication, deliverability, performance. Was the bridge between US team and Argentinian team. Developed the internal big data platform for Bose. Technologies: Next,js, Go, Pytest, Jupyter Notebook, Airflow.

Tech Lead / Scrum Master - Globant - Tandil - December 2018 - March 2019
Leading a front end team with a React and React Native stack. The responsibilities consisted on technically assisting the team, maintaining good code practices, leading the agile ceremonies, contacting and keeping the client updated with all the requirements aligned.

Senior Front End Software Developer - Globant - Tandil - March 2018 - December 2018
Developed different solutions for various projects. Worked with standardized processes for software development, testing and validation with the client. Applied Agile methodologies and worked with teams distributed all around the globe.

CEO - Hütte Bullen Startup - Tandil - 2015 - 2019
Created a product and a Startup from the ground up. The software is targeted to the meat industry and involves making farms more efficient with the usage of genetics information and making use of standardized processes.

CEO - Blit - Tandil - 2016 - 2017
Created a software factory startup along my partner. The company was focused on creating different software solutions for different industries such as agroindustry and retail. The technologies varied from web, to mobile and desktop.

SMB Sales Internship - Google - Buenos Aires - June 2015/November 2015
Worked in projects to improve sales performance in Latin America and Mexico. Optimizing AdWords accounts. Side projects that involved developing apps for the Sales Team.

Teacher Assistant - Software Methodologies - UNICEN -Tandil - 2014-2015
Support teachers in classes, correction of exams, presentations and followup for the students.

Projects

Assessing the Refactoring of Brain Methods - Implemented a complex solution to analyze and solve brain methods as an Eclipse Extension. Analyzed the Eclipse codebase and created an algorithm using Simulating Annealing to present different approaches to minimize the code smell. Presented on the Journal TOSEM.

Skills

Java, Elm, Next.js, Reactjs, React Native, JavaScript, C/C++. Other:HTML, CSS, Enzyme, Cypress, Typescript, MySQL, Invision, Figma. Git, React Native, SymmetricDS, Eclipse, Divi.
