EXPERIENCE

Principal Software Engineer — **Infor, Product R&D** — **Tandil, Bs. As.** — **March 2013 - Present**

- Currently managing a team of 6 engineers using Agile Methodologies. We are working on the backend of the mobile point of sale of the Product.
- Improved our estimation process by using Story Points.
- Evaluated candidates in technical interviews. Involved in the candidate selection.
- Improved code quality by fomenting the usage of automated tests and pull request guidelines.
- Implemented volume load and performance testing using JMeter and Bash.
- Worked with Tier-1 Retailers and interacted with them in regular basis. Managed deliveries and expectations.
- Delivered product implementation to two different clients in the Cloud using Amazon Web Services.
- Delivered custom product implementation to one client on premise.
- Led a cross-located team located in the USA and Argentina using Scrum. Focused in the customer success.
- Developed integration against ACI payment authorization system.
- Developed integrations against Customer's external services. Solved issues related to networking.
- Developed the first Product that was fully implemented in Argentina. Created an automated website test suite using selenium for improving our regression testing.
- Improved Product's integrations using Enterprise Integration Patterns.
- Improved Product's data-import process.

Software Engineer — **Technisys, Mercantil** — **Tandil, Bs. As.** — **October 2012 - March 2013**

- Full stack development for a web application of a Bank.
- Integrations with third party services.
- Database maintenance.

Engineer — **Southworks, Microsoft** — **Tandil, Bs. As.** — **March 2011 - February 2012**

- Bug fixing for Windows Azure, SQL Server, Microsoft Media and Microsoft ASP.NET Trainings.
- Created Automated Tests using Selenium and Visual Studio Coded UI Tests.
- Added Continuous Integration using TeamCity.
