Summary

I joined AA in December 2021 as the Medical Head to lead the team to drive a compelling medical strategy aligned with the cross functional team to bring more smiles to patients.

Medical expert with 16 years' experience in Pharmaceutical Company and Clinical Research Organizations. Throughout the years, I have led diverse teams to achieve medical objectives by providing therapeutic/strategic input into due diligence projects. I establish highly credible relationships and have personal impact through engaging respectfully and professionally. Strategic critical thinker, innovative, flexible, and able to drive multiple-simultaneous initiatives. I like to try new things and learn from experiences. I am motivated by working in a company that has an impact on people's lives.

I have held various roles with growing responsibilities in medical affairs, clinical trials and market access being my last position Squad Member for Hemophilia (rare condition) leading not only the medical strategy but also innovative access solutions so that more patients could receive the best treatment.

I provide clinical and scientific leadership through interaction with internal and external stakeholders. Trust, Respect and Collaboration are core values I live by.
