WHO AM I?

I am 30 years old. I was born in Baradero, Buenos Aires, Argentina and I graduated from National University of Rosario where I´ve got the Electronic Engineering degree. During my studies I have developed strong skills to solve problems and through these years I have also built successful working relationships and resultantly, an advantageous professional network. I think that I could colaborate to improve teams to take it to the highest standards of software development.

EXPERIENCE

At Present
March 2021

Full Stack Developer — **Telecom Argentina**

Currently, I am working on a startup fintech (it belong to Telecom) developing new products. We are using React Native, Reactjs for frontend. For backend, NodeJS and AWS services. Also, we working in native integration in Android and iOS with React Native.

`React Native / Android - iOS / NodeJS - AWS / PostgreSQL`

February 2021
October 2018

Full Stack Developer — **Cooperativa de Trabajo Tecso**

I have been work on diferents projects for back and front-end where I have been applying .NET framework and Core for back-end and AngularJS/Angular6-7-8 for front-end. Also, I have been work on a mobile application based on Ionic 5 and Angular 9 where use ngrx framework. In parallel, participate in a migration of an administrative system in old technologies to React, using react hooks and metronic template. Referred to migration, we built the entire front end architecture from zero. We used Typescript with Angular and React in all projects.

`.NET / Angular / React / Typescript / Redux`

September 2018
August 2017
