EXPERIENCE

Leniolabs_ LLC, San Francisco, CA — *Frontend Developer*

MARCH 2022 - PRESENT

PayPal:
Currently working on one of PayPal's current products for fraud protection (LECS: Large Enterprise Custom Solution and also FPA: Fraud Protection Advanced), this software (LECS version) was acquired by PayPal a while ago, previously called Simility. Now Paypal has re-adapted the old simility to a new product called FPA used by large merchants.

Vaster, Córdoba — *Frontend engineer*

DECEMBER 2021 - 2022

Maecenic:
An innovative collaborative economy tool that facilitates the interaction and meeting of entrepreneurs and people who wish to support High Value and Triple Impact projects (environmental, economic and social), through the use of Distributed Ledger Technology. , DLT), whose best known form is the Blockchain.

Retia Soft, Córdoba — *Frontend developer*

Beaux:

OCTOBER 2020 - 2021

PWA in development which will allow not only beauticians but also managers and providers to keep track of appointments, treatments, equipment rental (as well as its availability), etc. It also includes a daily checkout for income, expenses, among other features.
Tasks: Front-end design for the application, based in Atomic design, prioritizing modularity and composability for code reuse. Integrate and adequately configure third-party libraries such as Google Maps API, Calendars, socket.io.

Red Sanitaria:

NOVEMBER 2019 - OCTOBER 2020

PWA for public and private health centers. Helps manage patient information, resources, billings, and social work payments.

Tasks: Analyze, design and implement optimal solutions for the required UI components.

Worked with UI libraries like Material UI and CSS preprocessors like SASS. Designed abstractions based on new React features such as Context API, hooks, and error bounding.

TECH SKILLS

ReactJS - custom hooks, context API, HOCs - Flux pattern

JavaScript (promises, async - await, ECMA6, etc)

HTML

CSS - SASS - Bootstrap - styled components - material UI (CSS-In-JS library)

Django

PL / SQL

Git

Scrum

Socket.io

GraphQl

LANGUAGES

English - Upper Intermediate (B2)

Spanish - Native

Common practice:

Correctly analyze the business for a good implementation of front-end solutions.

Achieve good semantics with HTML.

Implement the required abstractions using advanced patterns in React, including custom hooks, higher order components, contexts, etc.

Design service layer, correctly implement asynchronous calls with JavaScript.

Research the best options for third-party libraries when needed.

Write documentation for general design. (coding guides, UI patterns, UI components, etc)

Design completely responsive solutions.

Git and Atlassian tools (Jira, confluence, bitbucket), Trello, Gitlab, Github.

Agile methodologies: Scrum, kanban.

FaMAF - UNC, Córdoba — *PWA Frontend developer*

NOVEMBER 2018 - DECEMBER 2018

PWA project for a "clicker" or idle game. Used ReactJS (JavaScript) for frontend and Django (Python) for backend. Used Agile methodologies (Scrum).

Tasks: Develop required logic for user interface with ReactJS (class based-components).

Design and implement backend solutions with Django REST (Python)

Use class diagrams, entity-relationship model, and create documentation.

EDUCATION

FaMAF, UNC, Córdoba — *Licenciatura en Ciencias de la Computación (5-year Computer Science Degree)*

2016 - PRESENT (thesis)

FaMAF, UNC, Córdoba — *Systems Analyst*

2016 - 2018

Colegio Dr. Antonio Nores, Córdoba — *Bachiller en economía y administración*

2010 - 2015
