I have knowledge about the required structure, phases and implementation to give solution to an specific problematic or necessity by the making of software.

Entity Relationship Diagrams (ERD)

I'm able to read and design ERDs to develop the relationship model between the entities in a database.

Web Design

I'm able to create the design of websites and apps by using the following technologies:

- HTML5
- CSS3
- SASS
- BOOTSTRAP
- MATERIALIZE
- WEBPACK

Frontend Technologies

I'm able to develop functional and aesthetic frontend with the following frameworks/tools:

- JAVASCRIPT
- JQUERY
- VUE
- QUASAR
- REACT
- ANGULAR
- IONIC

Backend Technologies

I'm able to develop optimal and functional backend with the following technologies:

- PHP7
- CAKE PHP
- LARAVEL
- JAVASCRIPT
- NODE
- EXPRESS
- SAILSJS
- NESTJS
- POSTGRESQL
- CODEIGNITER
- MYSQL
- MONGODB

Other Technologies

I also have knoledge in the following tools:

- AWS
- GRAPHQL
- WEBSOCKETS

Agile Methodologies

Among the methodologies in my repertory to organize or plan the projects, I have knowledge in tools like:

- SCRUM
- KANBAN
- SCRUMPOKER

Academic Information

I studied for two years (2016-2018) the Informatics Engineering career in the National and Experimental University of Guayana (UNEG in its original language).

Throughout the career experience I started to practice my profession.

I was receiving particular capacitation for two years (2017-2019) in different technologies and areas of Web/Native development while i was implementing them in my work experience.
