Summary

Hi! I'm Matias, a front-end developer with many years of industry experience. I studied multimedia design, which has provided me with strong UI/UX fundamentals and a keen eye for detail. I am very passionate about programming and always willing to learn new things.
I'm mainly focused on React, but I've had professional experience with other frameworks/technologies.

Experience

Front End Developer

GOIAR

Mar 2019 - Present (4 years 5 months)

- Currently leading the development of LDC's internal management platform.
- Developed a virtual decorator app module and web app for Sinteplast.
