Summary

Developer specializing in front end development. Knowledge in OOP, software design patterns, agile methodologies. Excellent reputation for resolving problems.

Clean code lover and high-performance software developer. Strong commitment to developing high quality web applications.

Skill Highlights

- React JS
- React Hooks
- JavaScript
- TypeScript
- CSS3 – HTML5
- Java

Experience

Junior Developer - 04/2019 to 03/2020
Technisys, Tandil, Buenos Aires

At the beginning, I was training for the project which I was designated. Then I started with small developments to finally have a great responsibility in the project developing functionalities of considerable complexity.

Ssr Developer - 04/2020 to 04/2022
Technisys, Tandil, Buenos Aires

I got this promotion due to the difficulty and importance of the developments I was doing. And then, I began to make decisions in the development of the functionalities and trained some new resources that were added to the project.

Freelance Web Developer - 03/2021 to 04/2022
Mercantil

I worked on the maintenance and development of new functionalities of online banking for people.

Ssr Developer - 04/2022 to present
Leniolabs

I was assigned to the client Diligent and there I was part of the front-end development team where a new application created from scratch was implemented.

Education

Systems Engineer – 2013 to present
Universidad Nacional del Centro de la Provincia de Buenos aires, Tandil
