Experience

Cloud Engineer

Escala 24x7 Inc.

May 2022 - Present (1 year 2 months)

As member of the CSD (Cloud Service Delivery) team, I participate in the processes of Architecture, Infra deployment, Go-Live, SysOp, SysAdmin and Support of cloud solutions based on AWS Cloud.

Skills required/developed throughout the experience as member of the CSD team:

-AWS: EC2, VPC, S3, Lambda, DRS, CloudFormation, CodeCommit, CloudWatch, SSM, IAM, among others.

- IaC: Design, develop, document, test, and debug new and existing architecture deployments using infrastructure as code (First option: Terraform, second option: CloudFormation).

- Provide top level support to the DevOps team and integrate with existing infrastructure.

- Documenting operational and security standards and solutions, integration with top tier security vendors (mostly firewalls) into AWS.

- Awareness and troubleshooting of Linux/Windows/Networking and how it works to integrate within the cloud environment.

- Experience with Jenkins (CI/CD), AWS (infra), Terraform (code) and GIT as source control (Enterprise Github).

- Python and Linux Shell scripting alongside AWS CLI commands, to automate (fully or partial) manual repetitive procedures, involving infrastructure changes in AWS.

- Be responsible for the planning, implementation, and growth of the AWS cloud infrastructure.

- Troubleshoot the system and solve problems across all platform and application domains

- Basic understanding of Dockers and Kubernetes.

SRE & Infrastructure Developer Engineer

J.P. Morgan

Jan 2022 - May 2022 (5 months)

In addition to fulfilling the role of SRE Engineer, Infrastructure Developer Engineer involves the following points:
- Development, maintenance and general support for applications' infrastructure using automation models such as: IaaS (Infrastructure as a Service) and IaC (Infrastructure as Code). Special mention to Ansible capabilities.
- Creation and processing of the entire applications' monitoring and telemetry components for supported infrastructure.
- Full automation for manual or semi-automated process, using several tools and programming languages for this end.
- Migration from on-premise (JP Morgan's owned Data Center) to AWS Cloud (AWS Outposts) for top priority applications. Part of the migration was to deployed a CI/CD pipeline in order to facilitate DR tests, upgrades to application's source code and security reviews/checkups before the final deploying in the cloud.

GNS SRE Engineer
J.P. Morgan
Jan 2021 - Dec 2021 (1 year)
- Building Software to Help Operations and Support Teams (Automation)
- Fixing Support Escalation Issues
- Monitor and support important applications for company's daily operations
The specifics responsibilities and duties:
- Administering production jobs
- Understanding debugging info
- Rolling back a bad software push
- Bringing up additional serving capacity
- Using the monitoring systems (for alerting and dashboards)
- Describing the architecture, various components, and dependencies of the services

Infrastructure Support - Network Engineer
J.P. Morgan
Jan 2020 - Dec 2020 (1 year)

Pre Sales Engineer
Westcon-Comstor
Jun 2018 - Jan 2020 (1 year 8 months)

IT Security & Networking Consultant
Telefónica
Oct 2017 - Jun 2018 (9 months)
IT Security & Networking Consultant
Design, Engineering and Implementation of Customer Solutions

Pre-Sales Engineer, CCA (Caribbean Central America)
Westcon-Comstor
Sep 2014 - Jul 2017 (2 years 11 months)

Westcon Pre-Sales' team member for Caribbean and Central America Region. Responsible for many vendors including the following sectors: Information Security, virtualization, access and networking.

Main functions as a Pre-Sales Engineer are:
