Compliance Alerts

Please note businesses are responsible for conducting their own KYC (Know Your Customer) checks. The Compliance Alerts generated by this report display possible matches for business or individuals. Matches are generated using many data points e.g. name, address, date of birth, possible alias, country etc. We recommend users click on each alert to view details of the potential match and use a screening tool (like KYC Protect) to ensure that screening is conducted in line with your own business risk appetite and internal processes.

Last updated 03/17/2025 08:04

Current Directors

	Name	Gender	DOB	Address	Compliance Alerts
	Zheng Xing	-	-	-	
	Lin Hongzhi	-	-	-	
	Shao Xun	-	-	-	No Alerts
	Wu Hao	-	-	-	

Compliance Alerts, Compliance Risk, Indicators, KYC reports (together 'Compliance Data') are created with Creditsafe data enriched by data provided by several third-party suppliers which would not be possible for Creditsafe to guarantee accuracy.

Creditsafe Compliance Alerts screens selected business or individuals (directors, Ultimate Beneficial Owners (UBOs) using a minimum of 90% matching score, to generate alerts relating to the following categories of risk: Sanctions/Watchlists and Enforcement Agencies. The screening tool matches based on whether the entity searched is a

business or individual, aliases, date of birth (with a 12-month tolerance), country and gender. If some of the data needed to match is not available the algorithm assumes a possible match. EXAMPLE: A search for "Mohamed Ali" with no residential country but with a date of birth and a Director of a UK company gives a 100% match. Mohamed Ali is a very common name and often regulators do not store date of births of persons on watch lists. The address of his work is also not taken into account as it is not a confirmed legal personal residence. A 100% match does not mean the Director in question is a match. We must look at the details of each potential record reported.

The compliance data is not intended to be used as the sole basis for any decision making and is based upon Creditsafe data that has been enriched with data provided by third parties, the accuracy of which it would not be possible for Creditsafe to guarantee. The Service is provided without warranties of any kind, whether express or implied and no representations are given in relation to the information provided. Creditsafe seeks to exclude any liabilities that may arise out of the use or misuse of the information.

NOTE: Compliance alerts have no impact on a company's credit score and are made available to simplify the process of conducting your own compliance checks only. Large reports with more than 50 names to screen, will not be generated. This limit will increase in the future.

Activities

Principal Activity

Activity Description	The target subject is mainly engaged in the manufacture of basic chemical raw materials.
Business Scope	Licensed items: hazardous chemicals management; Hazardous chemicals production. (For projects subject to approval according to law, business activities can only be carried out after approval by relevant departments, and the specific business projects shall be subject to the approval documents or certificates of relevant departments) general projects: manufacturing of basic chemical raw materials (excluding manufacturing of licensed chemicals such as hazardous chemicals); Production of chemical products (excluding licensed chemical products); Manufacturing of special chemical products (excluding hazardous chemicals); Import and export agency; technology import and export; Import and export of goods; Technical services, technology development, technical consultation, technology exchange, technology transfer and technology promotion; Research and development of emerging energy technologies; Research and development of new material technologies; engineering and technical research and experimental development; Manufacturing of electronic special materials; Sales of electronic special materials; Research and development of electronic special materials; Energy storage technical services; Sales of building materials. (Except for projects subject to approval according to law, business activities shall be carried out independently according to the business license)
Industry Description	This class includes the manufacture of chemicals using basic processes, such as thermal cracking and distillation. The output of these processes are usually separate chemical elements or separate chemically defined compounds.This class includes:- manufacture of liquefied or compressed in organic industrial or medical gases:* elemental gases* liquid or compressed air* refrigerant gases* mixed industrial gases* inert gases such as carbon dioxide* isolating gases- manufacture of dyes and pigments from any source in basic form or as concentrate- manufacture of chemical elements- manufacture of inorganic acids except nitric acid- manufacture of alkalis, lyes and other inorganic bases except ammonia- manufacture of other inorganic compounds- manufacture of basic organic chemicals:* acyclic hydrocarbons, saturated and unsaturated* cyclic hydrocarbons, saturated and unsaturated* acyclic and cyclic alcohols* mono- and polycarboxylic acids, including acetic acid* other oxygen-function compounds, including aldehydes, ketones, quinones and dual or poly oxygen-function compounds* synthetic glycerol* nitrogen-function organic compounds, including amines* fermentation of sugarcane, corn or similar to produce alcohol and esters* other organic compounds, including wood distillation products (e.g. charcoal) etc.- manufacture of distilled water- manufacture of synthetic aromatic products- roasting of iron pyritesThis class also includes:- manufacture of products of a kind used as fluorescent brightening agents or as luminophores- enrichment of uranium and thorium ores and production of fuel elements for nuclear reactors
