Certification Authority

The Vibration Institute is an ANSI accredited, third-party, certification body, accreditation number 0845. We are accredited to the ISO/IEC 17024, *Conformity Assessment - General Requirements for Bodies Operating Certification of Persons*. We meet the requirements of ISO 18436-1, *Condition Monitoring and Diagnostics of Machine - Requirements for Assessment Bodies and the Assessment Process*. The Vibration Institute operates its certification scheme based on ISO 18436-2.

Evidence of Qualification

By issuing this certificate, the Vibration Institute attests to the qualification of the holder as defined in the ISO 18436-2, *Condition Monitoring and Diagnostics of Machines - Requirements for Qualification and Assessment of Personnel - Part 2: Vibration Condition Monitoring and Diagnostics*, but does not give authority to perform machinery vibration measurement and analysis. It is understood that the employer will authorize the certificate holder to perform the machinery vibration measurement and/or analysis and take responsibility for the test results.

Conditions of Certification

This certificate is the property of the Vibration Institute and is valid during the state dates provided the holder is physically and mentally capable of performing the subject duties, has not had a significant interruption in such duties, and has not violated the Vibration Institute Code of Ethics.
