SUPPLY CHAIN

Should the need be required, Ramps will provide end to end services from sourcing what you need to getting it where you need it. Ramps has the capability to manage your inventory and distribute to the point of need with real time tracking and reporting.

DISTRIBUTION PROCESS

- As cargo comes into our warehouse, we will ensure it is weighed, scanned and verified.
- This information would be uploaded to the customer's portal as well as emailed via the warehouse receipts
- Cargo will be stored safely and in adherence to any temperature or other requirements to maintain its quality and integrity
- Based on the orders we can prepare and ship via air freight directly to some islands
- For others; we can prepare and ship directly 40ft or 20ft's to Trinidad or the islands
- For reefer containers, we usually have them arrive for loading the night before, plugged in to the generator at the set temperature and monitor the temperature control before loading in the morning – this gives a greater guarantee that your goods will be shipped in the proper temperature-controlled setting in transit

OVERVIEW OF LASER

- Enables greater transparency and reduces inefficiencies
- Boost growth and decrease cost
- Interfaces directly with your ERP system
- Real-time information on your shipment
- Manages and tracks your purchase orders
- Greater control and proactive decision making for you

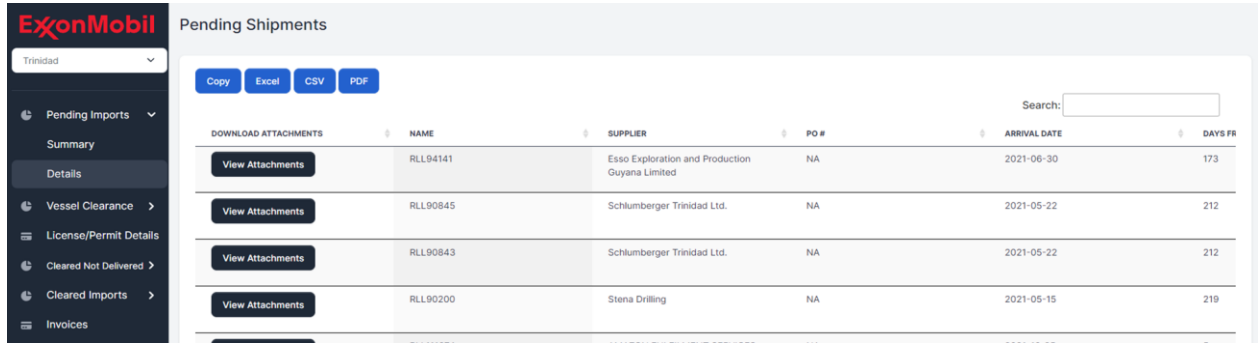

LASER
Logistics And Supply Chain Extractive Reporting

LASER WEB APPLICATION DASHBOARD FEATURES

1 Customs Clearance

The Laser web applications offers its users an interface that provides users with real-time data and updates on all shipments pending customs clearance.

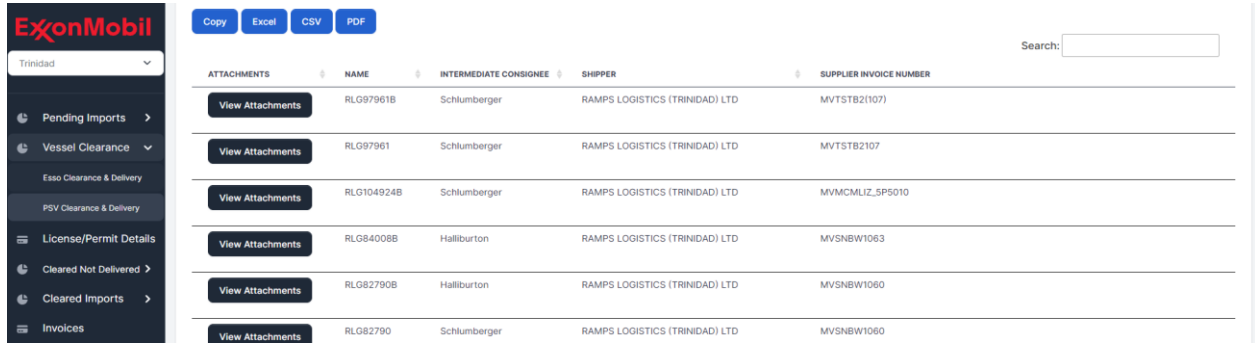

At any time, users can access information on all shipments, expected clearance dates and real-time updates from their logistics provider.

2 Vessel Clearance

The system provides its users with easy access to view the movement of all vessels and cargo in all countries of operations and all rigs.

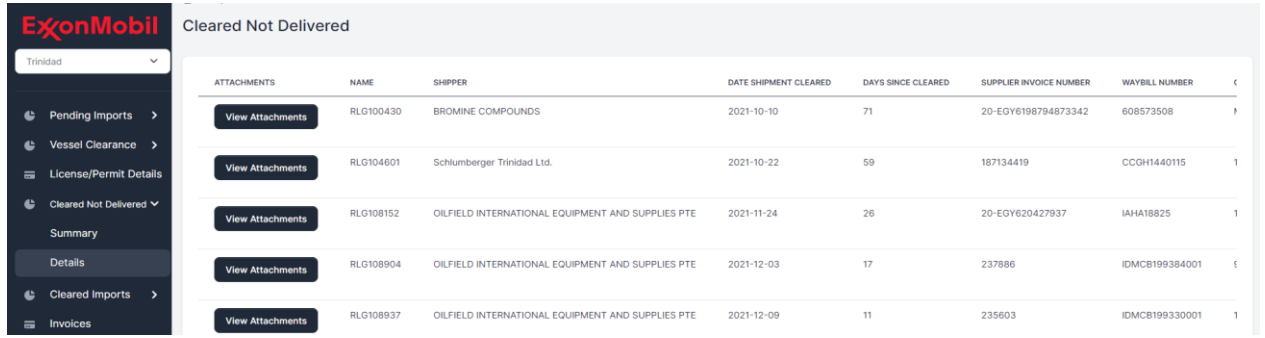

The system also provides users with key performance indicators on these clearances and the movement of cargo.

3 Transportation

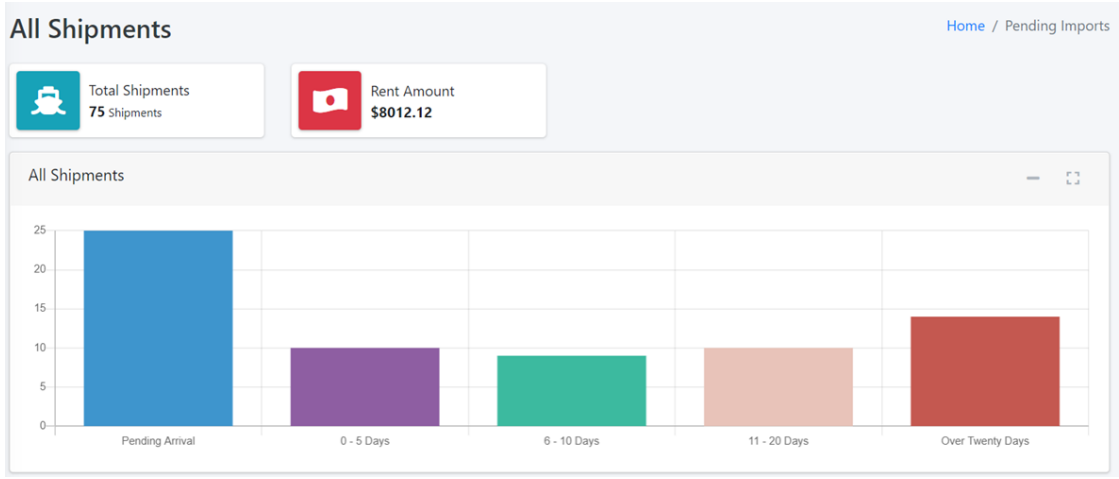

This web application allows its users to have full visibility into all shipments that have been cleared but still pending delivery to its delivery location.

Customers therefore have clear visibility into key performance indicators of their transportation provider to understand any gaps areas for improvement.
