Scoring Crediticio : Medium-low

Análisis de Riesgo : Good

Puntaje : 70

Análisis de Riesgo

The GlobalCIS® Credit Rating ("GCR") is a score based on statistical analysis of both financial and a wide range of non-financial data. The GCR algorithm predicts the probability of the Subject Business Entity (SBE) becoming insolvent in the 12 months following the date on which the algorithms generate the corresponding GCR score.
An integral part of the GCR and Risk Assessment provides an estimated credit amount that can generally be considered for a specific period, based on the facts available at the time of review.

Factores Determinantes

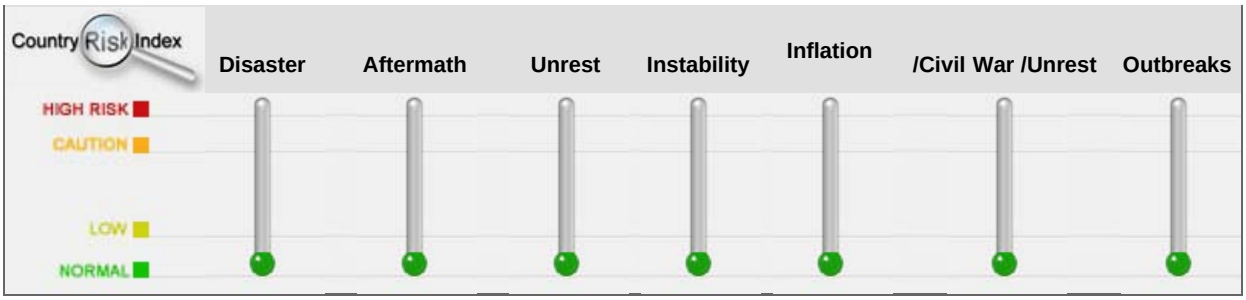

GlobalCIS® Credit risk assessment is gauged on 12 key business factors.
Each factor is assigned a rating and the total is aggregated and weighed in consideration of any other influencing factors relevant to the final assessment.

These factors include but are not limited to:
