Leandro Iglesias

Big Data Architect and Big Data Evangelist

Extracto

The result of several years of working and studying in the field of computer science and information technology, and the participation in different projects has given him a baggage of knowledge and experience. He has integrated work groups oriented to tasks comprising the different stages of the software life cycle. He has worked for more than 2 years in the development of several systems SAP, and in the last years starting with stand-alone applications. He has always shown a very good relationship to all of the people he has been working with, attitude which makes him a good team player. Always trying to encourage and help others and showing a proactive behaviour summarizes his personality.
