CAMILO GOMEZ JARAMILLO

SR. FULL STACK DEVELOPER

SUMMARY

More than 9 years of professional experience as Full Stack Developer in the following industries: GPS Tracking, Processes, Healthcare.
I stand out due to being able to understand difficult concepts easily, for finding alternate solutions and due to my outstanding mechanical, spatial, abstract and numerical reasoning.

EXPERIENCE

SR. WEB DEVELOPER & PROJECT LEAD, TCS

Montevideo, Uruguay — 2014-Today

- Development, maintenance and enhancement of a reporting web application built from scratch to replace the old systems of one of the major health insurance providers in the U.S. developed with Angular JS, Spring Java framework and Oracle PLSQL.
- I'm the project lead in charge of a group of 6 developers and 2 testers.

Accomplishments

- Implemented a Cron based job scheduler that allows automation of reporting processes.
- Implemented different tools to reduce toil within the continued growth and maintenance of the project.

WEB DEVELOPER, ZURICH SERVICIOS S.A.S.

Bogota, Colombia — 2011-2014

- In charge of several projects that mainly involved customizing and integrating different Open Source products like Drupal, ProcessMaker, Sugar CRM, Alfresco and Jasper Reports.
- Depending on the project requirements, worked with several programming languages like PHP, Python, Node.js and Java, Databases like MySQL and SQL Server and did extensive work with Javascript and CSS.

Accomplishments:

- Developed some ProcessMaker plugins to meet customer needs.
- Integrated ProcessMaker and Jasper reports to output reports on completed processes.

WEB DEVELOPER, INVYTEC

Bogota, Colombia — 2009-2010

- Development, installation and maintenance of the company's new web platform for satellite tracking of vehicles developed with Silverlight, C# and SQL Server 2008.
- 100% Scrum Agile methodology.
- During my time in this company, as part of the project, I lived three months in Spain and two and a half months in Guatemala.

Accomplishments

- Implemented a scalable architecture that allowed us to handle 30.000 GPS events per minute.
- Implemented a Silverlight component that allowed the view of a vehicle GPS history in a map as if it were a video player.

EDUCATION

- **Systems Engineering 2006-2009,** Universidad de los Andes, Colombia. Did not graduate due to financial issues.
- **High School with emphasis on IT and Economics 1991-2005,** German School Cali, Colombia.
