

HERNÁN MELIA

Software Developer
33 years old

ABOUT ME

When I was 14 years old (1999) I had my first contact with what ended being my passion. It happened when a friend borrowed me a C language book and after getting some experience programming ended being my dreamed work. It would be proper to point out that I've been always interested in the web app development specially. I consider myself a self learning person and I love to face new challenges that requires to use creativity in order to grow profesionally.
