ABOUT ME

"Never stop learning because life never stops teaching"

The passion for what I do leads to me every day to want to continue learning and it keeps alive the curiosity of live new experiences. I think anything is possible, as long as you believe in it and put all your energy on it.

With almost 5 years in the world of development, I can say the achievements are the result of the decisions that we made and the goals that we propose to ourselves. That is why I consider myself a persevering and positive person, who gets what it proposes because it loves what it does and always gives its best effort.

My professional goal is my constant evolution and growth within the company where I work, sharing knowledge and experiences with my working group because I believe that teamwork always results better and the experiences are always enriching.
