## LANGUANGES

**Spanish -** Native
**English -** Intermediate

## SKILLS

- Solid knowledge of programming concepts that allow me to learn **new technologies** quickly.
- Practical knowledge on the development of RESTful APIs, web services and web applications with **.NET** and **Node.js**.
- Deep understanding of modern **JavaScript** and advanced concepts such as closures, IIFE, asynchronous code, prototypes, hoisting, currying and memoization.
- Strong experience using version control software, such as **Git** and **Team Foundation Server**.
- Good knowledge and experience using **Angular** and **TypeScript** to create web applications and mobile applications with **Ionic**.
- Solid theoretical and practical knowledge of **front end** technologies, as well as web standars and cross-browser development.
- Experience working with relational and no-relational data bases such as **SQL** and **MongoDB**.
- I'm stable writing **unit tests** and generating **testeable code**.
- Solid understanding of the most common programming **design patterns**.
- Experience writing **Smart Contracts with Solidity** to builds decentralized applications (DApps).
- Basic knowledge of **Docker** and **Kubernetes**.

## LEARNING

- I am learning **Python** again. I love it.
- I am learning to implement **microservices** architectures to build more scalable applications.
- I am improving my **Devops** mindset.
- I am starting to use **AWS**.
- I am improving my oral skills in **English**

## PERSONAL SKILLS

- Fast-learner.
- Great communication with people.
- Critical thinking.
- Good pressure handling.
- Life-long learner.
- Adaptable to changes.
