GitHub: https://github.com/codelario

I am a Javascript developer with strong UI knowledge. Able to lead groups, work unsupervised, on own initiative and as part of a team.

My analytical skills and technical knowledge provides me the flexibility enough to achieve my purposes.

I do my best effort to add value to the project I'm working on.
Willing to keep growing inside multinational organizations.

Job Experience

- **Senior Developer at AAJ Technologies**
  Julio 2018 - Present
  My role in Oz is as a Senior Frontend Developer working with technologies like Angular/Ionic, elektron but at the same time, involved in the Backend side using nodejs and mongodb .
  I have also participated in a couple of VR, AR projects in Unity3D for an important event of the company.

- **Technology Architecture Delivery Specialist at Accenture**
  November 2015 - Julio 2018
  My first experience in Accenture was as a mobile developer, working with technologies like typescript/Angular 2/Cordova and Ionic 2.
  I was the main developer giving supports to the rest of the members of the team and at the same time giving Knowledge Transfer Session's to operations team.
  Right now I keep working on javascript technologies in a different project, as a frontend referent. Besides I've started to take responsibilities working in some of the daily tasks that a management leader needs to implement.

- **Senior Developer - Delloite at Globant - Delloite**
  May 2013 - November 2015 (2 years 7 Months)
  My performance is associated with developments as a Web UI Developer taking as main technologies HTML, Javascript and CSS with teams of more than 30 professionals for major international companies.

- **Web, Mobile and Video Games Developer at Freelance**
  2012 - 2015
  I have developed websites (php5, mysql most of them). Mobile Applications for Android, IOS and Symbian devices (js, html, phonegap), video games for social networks and mobiles devices (html5, js) as a freelancer developer.

- **Web / Mobile Developer - Project Manager at Electronic Commerce Factory Sudamerica**
  June 2008 - August 2012 (4 years 3 months)
  I have worked in web and mobile applications projects, using frameworks and MVC model. Most of them required important knowledge about:
  · PHP 5 (OOP)
  · MySQL
  · Javascript / jQuery · CSS
  · HTML . SOAP
  - During this period I have worked in the development of WRT(Web Runtime) widgets for Nokia phones, most of them, dedicated applications for different important companies of Argentina. This include working with the platform services like GPS, data, accelerometer, sensors, etc.
  My responsibilities were making technical negotiations with the client of the company (API and interface requirements).

- **FAGDUT at PHP 5 - OOP teaching group**
  January 2010 - March 2010 (3 months)
  I have take part of a teaching group of "PHP 5 Object Oriented Programing and Zend Framework introduction" course issued by the company E-Fluxus in conjunction with FADGUT(National Technological University) aimed at students and professionals.
  The course had a duration of 74hs. and the topics were:
  * Quick review of PHP 4; syntax, session, cookies
  * MySQL basic syntax
  * PHP 5
  * OOP introduction; classes, instances, methods, properties o Abstraction, encapsulation, polymorphism, inheritance, Exceptions
  * MVC model
  * Zend Framework introduction to:
    Zend Application
    Basic Bootstrap creation
    Zend_Request
    Zend_View
    Zend_Form

- **Web Developer at Aerodinamic**
  April 2005 - May 2008 (3 years 2 months)
  I have worked as Analyst, Testing, Trainer and Development (PHP 4 language) in a lot
  of management systems, CMS, Shopping Carts and more for Aerodinamic's company in Rosario. During this period I was involved in important local and international projects. Some of the database technologies I learned were Mysql, Sql Server and Oracle db.

- **Freelance Developer at Web and Mobile Developer**
  March 2007 - June 2007 (4 months)
  During my first years at university, I have started to program in php language. This knowledges became me a freelance as a program.
  I have worked in a lot of important projects for internationals companies than make me a better programmer.
  In addition with my PHP experience I have acquired great knowledge in Databases (Mysql, MS Sql Server), Web Servers (apache, iis), CSS and HTML.

- **Systems Maintenance, Network and Technical Support at SPCOM - Soluciones.com**
  November 2003 - December 2005 (2 years 2 months)
  I have worked in the network maintenance sector for Soluciones.com company in Rosario. The company was engaged in software development (.NET technology) for internationals companies.
  During this period I have acquired solid expertise in networking and operating systems.

- **System vendor at Viarosario.com**
  November 2003 - December 2005 (2 years 2 months)
  During this period I have worked offering and installing the chat service for company clients.

Projects

- Web UI Developer in the project Insights Marketplace. Internal Tool which response as a client for manipulation of the reports requested from different sources.
  Company: Accenture
  Technologies: HTML, CSS, Bootstrap, Angular.

- I developed a framework which was the base for the rest of the mobile applications of the company. The technologies I used were Angular 2 (Typescript) v. Alpha, Ionic 2 v. Alpha, Bootstrap, css and html.
  Company: Accenture.

- Web UI Developer in the project Mar Central Phase 2. MAR Central was an existing Sharepoint 2010 tool developed by a Third Party for Deloitte. Its main purpose is to facilitate M&A engagements for the clients of the consulting practice. As part of its roadmap, a redesign overhaul was requested. Aside from the look & feel, improvement in the end user usability as well as the operation usability was requested.
  The goal of the architecture was not to replace the current technology, but to build a side-by-side
  optimization that improves the UX capabilities while still maintaining the flexibility and familiarity of SharePoint for future upgrades and advances customizations.
