Fabio Palumbo

Argentina

DevOps SR. at Banco Comafi

Summary

I'm trying to be a "life entrepreneur"; I apply my vision, talents, creativity, and energy not only to my work but also in my life.
I always tried to figure out how things work, from child, tried to crack open every radio and tv my fathers placed in my hand, that lead me to study Engenneer in Computer systems. Information, technology and social media were part of my life from that part, and always trying to create the "next big thing".

I like to dance "Salsa and Bachata", poems, to play the piano and to read because it's like living a thousand times, like travelling and endless experience of self-awakening.

I always try to integrate my personal time and my work, like Robert Frost once said "two roads, were place before me... and i choose the less traveled, and that made the whole difference."

My Certificates: goo.gl/KvW5eb

Experience

DevOps Specialist Sr. at Banco Comafi
July 2018 - Present (1 year 2 months)

Banco Comafi is a commercial bank of Argentine private capital. It has its headquarters in the City of Buenos Aires and has 65 branches distributed in that city, Greater Buenos Aires and the main cities of the interior of the country.

My Job consist in building programming cycles, based CI/CD with AWS-Azure / Jenkins. Managing the development of several tools (New Home Banking, PEC, RIO, etc) based on rest apis, Java endpoint and angular as Front End.

#Leading a Devops Team of 5 members using SCRUM

Adding testing frameworks (Cucumber, Junit, SonarQube, etc.) to the cycle to get better and more efficient code.

Also developing Private Cloud solutions based on Red Hat Openshift, with the same logic as AWS.

Skills:
*Managing multidisciplinary teams based on Extreme Programming (TDD, SOLID, clean code, refactoring, continuous integration, simple and incremental design, pair / mob programming, collective ownership of the code).
*Use of Domain-Driven Design, microservices and hexagonal architectures.
*DevOps with continuous delivery as the main value (AWS, Docker, Bitbucket, GitLab, Puppet, Terraform).
*Lean thinking (MVPs, eliminate waste and reduce costs, A / B Testing, total orientation towards KPIs and other metrics of the product).
*Continuous improvement through the dictation of katas and organization of practices communities.

Fullstack SSR at Quick Audits
January 2017 - Present (2 years 8 months)

Mantaining and developing the SaaS QuickAudits.io

Writing clean, fast PHP to a high standard, in a timely and scalable way
Producing detailed specifications
Troubleshooting, testing and maintaining the core product software and databases

Coding in:
- PHP Development
- Web & Mobile Design
- Zend 2 Framework
- Mysql
- Bitbucket

Responsibilities
Write “clean”, well-designed code
Produce detailed specifications
Troubleshoot, test and maintain the core product software and databases to ensure strong optimization and functionality
Contribute in all phases of the development lifecycle
Follow industry best practices
Develop and deploy new features to facilitate related procedures and tools if necessary

Devops SSR vravel.com at Almundo
February 2018 - February 2019 (1 year 1 month)

Virtual Reality is a rapidly growing promotional strategy. Some of the biggest brands in the world are employing it at events and trade shows, both because of the medium's novelty, and the effective way that it can show off products by creating an immersive experience for the customer. Virtual Reality presentations create an impact that lasts even after the experience has ended.

My job consist in building a strong foundation for this plataform, based in AWS Cloud Services / REST API, managing the development of the tools needed (Unity, Java, Andriod) for the cloud ecosystem.

Managing AWS and Unix-like environments.
Experience with configuration management tools (Puppet)
Experience working with Infrastructure as Code (Terraform)
IP Networking and/or Security
Automation with Puppet/ Terraform etc.
Performance Tuning
Systems Operations & Troubleshooting

Also applying my knowledge in programming (PHP, Mysql, MongoDD, ES6 Angular-React-Polymer, pair programming) and Agile scrum models.
