EXPERIENCE

Soluciones Andinas, Rosario— *Developer*

March 2018 - PRESENT

Client: Banco de Santa Fe.

ATMs software apps development.
Maintenance and development of upgrades and new functionality.
To bring a better experience to the ATM user or a bank employee.
We work with different languages: C#, Javascript, JAVA.

Neoris, Rosario— *Developer*

May 2015 - March 2018

Client: Telecom.

Maintenance and development of new web applications for internal and public use (clients and employees of the company).
I worked as a full-stack developer, using .NET C#, Javascript, AngularJS (old versions), JQuery, Web Services, etc.
I gained a lot of diverse experience e.g., Selenium automation, JQuery plugins, ORMS, deploys on IIS servers, client communication (talking and asking for clarification or explanations to the people you are working for).

Self-taught experience

I have gained a lot of experience practicing on my own.
As an introduction to programming, I developed two web apps with Javascript and PHP with MVC frameworks.
When I started my first job I reduced the time invested in my projects, but I keep practicing more slowly, watching tutorials, etc.
I am currently developing a mobile app using Xamarin and an ASP.NET Web API back end, I'm not at an advanced level with these technologies but I'm getting an introduction to its use.
I also used and gained some experience with different frameworks and tools like Automapper, Tesseract OCR, the current versions of Angular, etc. I'm constantly solving problems with installing, compatibility issues, deployment of applications and general use of different tools. So I consider myself not an expert but having a great IT proficiency overall.

SKILLS

Problems solving

Object-oriented design

Teamwork

.NET Framework, C#, Javascript Back and Front end web development

LANGUAGES

English intermediate.
Reading and listening comprehension: advanced.

EDUCATION

Instituto Politécnico Superior General San Martín, Rosario — *Analista Universitario Sistemas*
