Fernando Gómez Aita

Argentina

Fullstack Developer | C#, .NET, ReactJS, Redux, SQL, Scrum

Summary

I'm a developer that has over 4 years of experience in analysis, design, development, and implementation of various intranets, client-server and web based software applications using Microsoft and JavaScript technologies, primarily .NET.

Currently I'm highly interested in ReactJS and freelance remote jobs that requires the constant use of English to communicate between the team members.

My agenda for this 2019 includes joining the 100 days of code challenge in October, contribute to the open source community and keep pursuing my career.

Experience

Software Developer | C#, .NET, ReactJS, Redux, NHibernate, SQL, Scrum at Tupaca
December 2017 - Present (1 year 10 months)

Worked for Fox Networks Group in the financial application globally used in this company and affiliate sales.

- Participated in status meetings using daily scrums.
- Microservices.
- Described the API structure with Swagger.
- NUnit 3 for test coverage.
- StyleCop to unify development norms.
- ReactJS and Next.js for front-end development.
- Redux for application state management.
- Used Microsoft Visual Studio Team Services (VSTS) for all the source code maintenance needs, deployment and sprint government.
- Used NHibernate as well as plain SQL.

Software Developer | C#, .NET, JavaScript, SQL, Scrum at DL Consultores
April 2015 - December 2017 (2 years 9 months)

Enterprise level .NET applications development in a close relationship with SAP for clients such as Procter and Gamble (P&G), Molinos Rio de la Plata and Acindar.

- Participated in status meetings using daily scrums.
- Developed MVC applications in the .NET framework.
- Used technologies like AJAX for a rich UI experience.
- Designed and implemented database schemas for applications using SQL Server.
- Prepared estimates of effort and duration for development tasks and activities.
- Ensured that client and end-user requirements were met for various projects.
- Microsoft Team Foundation Server (TFS) for all the source code maintenance needs.
- Trained 8 professionals entering the company to acquire the basic knowledge to work in a software development team utilizing .NET and SQL.
