PROFESSIONAL EXPERIENCE

MS Technologies S.A Jan 2018 – Up Today

Argentina
Insurance - Agro - Bank - Sharepoint

IT Solutions Consultant - Team Lead - Senior Technical Project Manager

As a Technical project manager, I'm involved several projects from different clients such as San Cristóbal Seguros, Red Link, Owens Illinois, Banco Municipal Rosario, among others. My principal duties are to maintain all the life cycle of every project, planning every step of them in order to generate an schedule of every deliverable part, ensuring the compliance of every

deliver date, and of course planning and executing the architecture of each project. Also, if is required, I implement Agile methodologies as Scrum Master. In the other hand, I check de amount of efforts and hours, factibility and billing of each project. I used to use Microsoft Project or Jira, as Project tools, in order to organize the team and effort to compliance a dead line.

- Insurance company - San Cristóbal: Performing development tasks in ASP.NET using Framework 4.6.1 C#, MVC 5 and EF 6 with Bootstrap and Razor as front-en, for a messaging system to visits insurance producers, communicating with the Office 365 API(Planner using Graph API) synchronizing both tools. Migrating project to Angular 5.2, applying several architecture techniques in order get the best performance of the front end. I use GIT as a versioning tool through the use of VSTS (Visual Studio Team Services) with continuous integration in 4 different environments. Couching new entrants. Using tools such as Azure to manage the application and the database. Carrying out tasks to estimate new projects and contributing improvements within current projects.

- SFx Consultant: Development web parts and extension for SharePoint Online. Teaching a course in order to introduce the team members to this new technology. I have been using React JS, Office 365 Fabric JS in order to create better solution for several client.

- Team Lead: fulfilling the leader role through the whole team, in order to show to each member the better way to address any kind of development. Manning new project in order to achieve a new level of an existing product of Quality Management and RRHH Management using Microsoft platform such us: Net Core 2.1, EF Core, SOLID Principles, Angular 6 / React , configuring Azure continuous delivery and integration, applying Git Governance too and machine learning , BOT's development and AI for Microsoft azure.

- Power BI experience generating executive dashboards.

- Projects: San Cristobal
  1) Modelo Comercial Integrado (MVC 5, Angular 5, WebAPIs, Razor, EF6, Azure CI/CD)
  2) Catálogo de Productos (Angular 6 - Net Core 2.1, WebAPIs, EF Core 2.x, DI, IoC, Azure CI/CD)
  3) Dashboard PMO (Angular 6 - Net Core 2.1, WebAPIs, EF Core, DI, IoC, Project Online Api, Azure CI/CD)
  4) Credito Sola Firma (Angular 7 - Net Core 2.2, WebApis, EF Core, DI, IoC, Azure CI/CD)

- Hoshin Cloud - RRHH/Quality Product (Angular 6, Material, Net Core 2.1, WebAPIs, EF Core, SOLID, DI, IoC, Clean Architecture, Azure CI/CD)
