Luis Muzikant

Senior Java Developer en Despegar.com

Summary

Senior Java Developer/ Systems Architect / Technical Leader .

Certificated Scrum Master by Scrum Alliance
Certificated Java Programmer by Sun
System Analyst Degree in UBA (Exact Sciences)

Strengths:

Design and implement architectures based on microservices using Java 8, Rest services, Spring Boot, Spring Cloud, Eureka, Docker, Jenkins and kubernetes.

Other tools:

Presentation Layer: React, Spring MVC, JSF 2.0 and Struts.
Business and Persistent Layer: EJB3, JPA, Hibernate, IBatis.
Persistent layer: MySql,Cassandra DB, MongoDB, Postgresql, DB2
BPMs: Bonita BPM, Jboss BPM
Data Transformation: Talend
Test Automation: Jmeter, selenium
Application and Web Servers: JBoss, WebLogic, Jetty and Tomcat.

Experience

Despegar.com
Senior Java Architect
September 2018 - Present
Argentina

Senior Java Developer in personalization team. We are using technologies as Cassandra, Spark with scala, Redis, Kafka and java 8.

Cognizant
Java Software Architect
May 2015 - Present
Buenos Aires

Java senior developer and architect working at Banco Galicia, customizing a Sap Omnichannel solution.
My main duties are: estimating the impact and risks of new features and implementing them.
We are working using scrum as methodology. The technologies we are using are: a OSGI container from SAP called SMP based on Equinox,
Java 1.7, maven, JPA, quartz, Serena as source control, Jenkins and hibernate.

Indra
Java Architect
March 2012 - April 2015 (3 years 2 months)
Buenos Aires,Argentina

I worked in Indra-Ceicom as Integration Leader using scrum.
My work consisted in integrating code released by different development teams from Colombia and Buenos Aires. I had to analyze the impact of new components in the architecture, built deliverables for QA and production environments.
I had also to analize performance issues, tuning Jboss, developing Talend component for connection pool management, separation of the application on different nodes/pcs using the ESB and JUDDI, etc.

Our software processed files and flown sales from companies like Latam (Lan and Tam), GOL and IBERIA to sent them to an accounting module in SAP.
The architecture was based on Bonita as BPM, Talend ETL, JBoss ESB, Drools as brms and jUDDI.

Softtek
Java Architect / SOA consultant
March 2011 - March 2012 (1 year 1 month)

I worked in Softtek for its client Osde as Java Architect. I supervised code deliverables, I analyzed performance problems in different environments and I designed new functionalities.

I was a technical reference in a team of ten people working in Scrum way.
My duties were analyzing complex problems like memory leaks, locks, use of cache, JVM heap settings, Jboss profiling, etc. I had to explore new development and testing tools like Jmeter,Jenkins, Selenium, Sahi,etc.
I also estimated incidents and I distributed them on the team, I designed requirements and I performed factibility analysis.

Neoris
Java / XMII Architect
February 2010 - March 2011 (1 year 2 months)

I worked in a monitoring grains project for Bunge Paraguay. In that project my duties were risk Analysis, database design, development of Custom Actions in XMII (SAP technology for production line). Communication between XMII and Java. Development of web services and invocation by ajax in JQuery.

After that I was involved in a project for General Electric about trucks tracking. The technologies that I used were EJB3 on Netweaver 7.2 as application server, Web Dynpro xMII and in the view layer. My positions were Architect, technical lead and senior developer.

OSDE
Java Architect
July 2008 - February 2010 (1 year 8 months)

My duties consisted in: building Architectural guidelines for a Medical Care application. Validation of components and sources developed by an external provider. Providing technical support for developers and QA team. Validation of Junit, Jmeter, and their development strategies. Estimating development time and change controls.

Siemens Itron Business Services
Java Senior
2007 - 2008 (2 years)

I worked at Siemens IT in a project called Transmetro Guatemala. The business objective was to manage the transportation system of Guatemala capital city by using contact cards. The technologies involved were: EJB3, JBoss, Maven, JSF, Portlets, Jetspeed and Oracle 10g as database. My position was senior developer and I was in charge of the deployments in QA and production environment

Apernet
Software Developer
2005 - 2007 (3 years)

Java Senior developer
