.NET C# Senior Developer

.NET Semi Senior Developer

I worked in a team on the development of an internal web application to manage the billing of an important supplier for the retail power market, Transcanada. I worked on tasks regarding business or technical (performance) user stories, including both back and front end development. We used C#, ASP.NET, MVC, WCF, Entity Framework, Migrations, SQL Server, MSTest, Moq, AutoMapper, jQuery and Git. As part of a team, we had daily stand up meetings to report progress and discuss assignments, we were in direct contact with the client to clarify business needs and demonstrate each of the user stories before QA test. We also participated in meetings related to story review, sprint planning and retrospective

October 2013 – September 2015

GLOBANT
Argentina
TENARIS
.NET Semi Senior Developer

I worked in a big team on the development of an internal web application to manage all the logistics and dispatching of Tenaris. I focused on back-end and architecture for the app security and the preparation and delivery of several automatic app emails generation. I was in charge of deployments to different environments. I coordinated the bug fixing in production. I participated in the definition of the database and domain model and in the integration with other existing internal applications. We used ASP.NET MVC, LINQ, Entity Framework, MSTest, WCF Services, Fluent API, Simple Injector, TFS, and MSSQL.

November 2012 – October 2013

CMT Latin America
Argentina
CORPBANCA
.NET Semi Senior Developer

I participated in a CMR migration project for the well-known Chilean bank, Corpbanca. Above all I took part in the development of batch end processes and web-service development. I was part of the Incident Management team. We had several client meetings. We took part in tasks estimation and bug

.NET C# Senior Developer

fixing. We worked with the following tools: Pivotal, Win Forms, Web Forms, Web Services, XML, Crystal Reports, Entity Framework, SQL,ADO.NET, Reporting Services and Sharepoint.

SETUP

January 2012 – October 2012

Argentina
Trucking companies
.NET Developer

I took part in the development of a web site related to the management of lorry businesses. I developed a web application for providing information to clients and suppliers, e.g. stock control, consumptions, accounts information, logistics, etc. For a while I had to work alone which gave me more autonomy. I used: ASP.NET Web Forms, MSSQL, NHibernate, User Controls, SourceSafe, ADO.NET, Ajax Control Toolkit, JavaScript, CSS and HTML.

NEORIS

October 2009 – September 2010

Argentina
CEMEX
Software Engineer

I participated in the maintenance of a web site related to the management of human resources area for the Mexican company, Cemex. I took part in the employee information, vacation and absence tracking and payroll modules. We used**:** MSSQL, ASP, ASP.NET Web Forms, SourceSafe, Java Script, ADO.NET, AJAX and IIS.
