PROFFESSIONAL RESUME

Name: Lorena Glassel

Role: Senior Developer - EN (Engineer)

SUMMARY

Java developer with 14 years of experience in software development. She has been part of the development and maintenance of several applications related with banks, vehicles, medical coverage system and tourism applications. She has experience with object oriented programming and frameworks like Struts, Spring, Hibernate. She is focused on quality and details of the product. The several projects she has participated required good technical skills, knowledge of high and low level concepts.

DOMAIN EXPERIENCE

She is working in Endava, Rosario, Argentina as Senior Java Developer since March 2012.

In July 2016, she was hired as Java Developer at NaviHealth where she joined an ongoing project that had its activity in the world of health. She had to develop and maintain the current project, while she was also involved in the technical conferences and discussions regarding the development of the application and the roadmap of it. She had to learn the inside and out of the application in order to improve it, but also to add new features and functionalities. All the team was reduced by the client since July 2019, so nowadays she is on bench.

In March 2012, she was hired as Java Developer at BlueFly where she had to work with the design and implementation of an ecommerce site. She worked mainly on the backend and on some frontend tasks.

In April 2010 she decided to join Estudio Nemo, Rosario, Argentina as a Java developer where she joined an ongoing project that had its activity in the world of travel. The main responsibilities where to develop and maintain web applications for the tourism industry.

In March 2009 she joined HP, Hewlett Packard, Rosario, Argentina, as information analyst. She integrated the GVCT (Global Vehicle Call-of and Trade) group. Her tasks were to accomplish: Support and maintenance of the system with 24x7 on calls guards.

In March 2005 she was hired at Assist SA, Rosario, Argentina where she started her Java career path. She participated on two different projects, one related with medical costs and the other related with a home banking.

In August 2004 she was hired at Accenture, Buenos Aires, Argentina as junior programmer. Her main responsibilities were to develop, maintain and test the system of the Galicia bank.

She started her career in the Facultad de Ciencias Exactas, Ingenieria y Agrimensura, at the Universidad Nacional de Rosario, Rosario, Argentina.
