Professional Experience

OZ (aka AAJ Technologies) **Until now**

- **Scrum Master Accurate Group USA Nationwide appraisal and title services. Groundwork Project**
  - GroundWorksTM is a platform specifically developed to enable management and production of the property condition report (PCR) product. Accurate GroundWorks is like the Uber of real estate appraisals, with features that include a crowdsourcing design and an innovative mobile application. Accurate GroundWorks is widely used to increase the efficiency of the PCR process and accelerate the delivery of accurate, high quality valuations.
  - **Technology used:** Xamarin Studio, Sketch tool. Developed for Android and iOS. First release Feb 26th

- **Scrum Master Royal Caribbean Cruise Line.**
  - Excalibur is built on non-proprietary, open-source technology, an approach which will allow the company to maintain it easily and to keep continuously rolling out and testing new features, to keep up with ever-changing guest expectations.
  - POS PDI – Pleasure Day on Island and Guest Request – Bring me a Drink, both project under Excalibur`s umbrella as part of the Digital Transformation approach.
  - Team located in Argentina, Poland, Unites States, Czech Republic and India.

- **Project Manager Tuuci - www.tuuci.com. ABW**
  - ABW is an ERP developed by InfoPower Inc., our job is to support and update the ABW software with the requirements that the users need.
  - **Technology used:** Visual Studio 2015, ASP 1.1, .Net 2.0, SQL Server Reporting Services, Microsoft SQL Server, TFS.

- **Project Manager Runzheimer International**. - www.runzheimer.com. **EQUO**
  - Equo™ by Runzheimer simplifies mileage capture for the mobile worker. The app effortlessly records business mileage and simplifies the lives of mobile workers by automating the task of creating an IRS compliant mileage log. Building on our 80+ years of mileage tracking expertise, Equo leverages the latest technology and phone sensors to automatically detect when an employee is driving, and builds a mileage log behind the scenes. This means workers can focus on the road rather than the odometer to help them make the most out of their busy days.
  - **Technology used:** Xamarin Studio & Visual Studio, Xamarin Insights, Xamarin Test Cloud, Xamarin Profiler, Xamarin Sketch, C#, (Java, Objective C), MonoFramework, CocosSharp, Nuget, Akavache, SQLite, Rest, IIS, Git, Azure, TFS, Android & iOS.
