PROFFESSIONAL RESUME

Name: Gabriela Fregapane **Role**: Senior Tester

SUMMARY

She has about 8 years experience in manual software testing and previously worked for 2 years as a developer.

She has a degree in Information Engineering. She has advanced written and oral communication skills in English.

She has experience with manual testing and deep knowledge of the testing process.

Her experience, positivity, proactivity and readiness in offering support was repeatedly recognized by the current team members.

She has succeeded in complex projects dealing directly with clients.

DOMAIN EXPERIENCE

Working in Endava as Senior Tester for a project related to health services, she was responsible for testing web applications as well as web services. She was in charge of running Accessibility Testing to comply with Section 508 Standards. She had an important contribution in making deployments to all environments. She also provided knowledge transfer and took part in training new members of the team. Moreover, she was in charge of running demos for stakeholders.

Working in Endava as a Senior Tester for a project related to financial tools, she was responsible for writing and executing complex test cases. She provided functional support to the dev team. As well as this, she participated in the creation of new stories and defined acceptance criteria.
